INITIAL REPORT
DEMOCRATIC SOCIALIST REPUBLIC OF SRI LANKA

INFORMATION PROVIDED IN ACCORDANCE WITH ARTICLE 7, PARAGRAPH 2 OF THE CONVENTION ON THE PROHIBITION OF THE USE, STOCKPILING, PRODUCTION AND TRANSFER OF ANTI-PERSONNEL MINES AND ON THEIR DESTRUCTION

1. Introduction

The three decade-long civil conflict between Sri Lanka's security forces and the Liberation Tigers of Tamil Elam (LTTE) left many areas in the Northern and Eastern parts of the country contaminated by anti-personnel mines (APM) and Explosive Remnants of War (ERW). Both Sri Lanka's security forces and the LTTE laid mines. The Indian Peacekeeping Forces also used landmines during their presence in the affected area from July 1987 to January 1990.

Sri Lanka's security forces used APM and anti-tank (AT) mines; all were recorded. After ratification of CCW's Amended Protocol II in September 2004, all mines laid by the security forces were reportedly in accordance with the provisions of this protocol. The security forces handed over all minefield records to the mine action programme at the end of the conflict. All information is stored in the national Information Management System for Mine Action (IMSMA) database.

The LTTE used protective minefields in front of their defensive positions. They laid mostly AP mines and also utilised some AT mines. No LTTE minefield records are available. The LTTE also made use of nuisance mines, to prevent access to facilities including wells, buildings, roads and footpaths. Some mines were also scattered on the ground during the LTTE's rapid retreat during the final stages of the conflict in 2009. The LTTE used improvised explosive devices (IEDs) in the form of mortar shells connected to tripwires to act as fragmentation mines, bar mines, electrical and magnetically initiated explosive devices/ mines placed at strategic locations and mines connected with detonating cord to mortar/artillery shells from a distance. The LTTE manufactured most of the mines they used themselves; some were designed with anti-lift/anti-tilt mechanisms to prevent the removal of the mine from the ground after it was laid.

Starting in 2002, some mine/ERW-contaminated areas in the Northern and Eastern Provinces were cleared. The escalation of the conflict in 2006, however, resulted in areas being re-contaminated, in particular in the Northern and Eastern Provinces.

Sri Lanka’s ERW contamination mainly consists of unexploded airdropped bombs, artillery - delivered shells, mortar bombs, handheld anti-tank projectiles, rifle grenades and hand grenades. There are also sizeable caches of abandoned explosive ordnance, particularly in the North. When IDPs and refugees started returning to conflict-affected areas after 2009, the GoSL believed that Mine Risk Education (MRE) coupled with an effective Explosive Ordnance Disposal (EOD) response would be sufficient to address the ERW threat. During late 2010/early 2011, hundreds of ERW were reported every month by villagers and cleared by the Sri Lanka Army (SLA).

The remaining contamination is predominantly located in the Northern and Eastern Provinces, some of the most impoverished parts of the country. Minefields prevent access to agricultural land, land for resettlement, water sources and key secondary infrastructure, hindering socio-economic development where it is most needed. The impact of mines is felt acutely by displaced families, including female-headed households, who are awaiting mine clearance before they can return, rebuild their homes and engage in safe and sustainable livelihood activities.

As people return to their homes, it is essential that areas used for livelihoods are cleared simultaneously. Despite the clear demarcations of contaminated land and sustained MRE efforts, there is a real risk that returnees will enter contaminated areas (especially into agricultural land) to meet their livelihood needs. It is therefore imperative that livelihood needs are taken into consideration in the prioritisation processes related to resettlement plans, as is currently the case.

2. National Implementation Measures

The GoSL deposited the instrument of accession to the Convention on 14 December 2017, furthering our commitment for a mine free Sri Lanka by 2020. The Cabinet of Ministers instructed the Ministry of Justice to liaise with the Legal Draftsman's Department to draft enabling legislation, considering the dualist nature of the Sri Lankan legal system. Accordingly, a preliminary draft has been made available to which the Attorney General’s Department has also provided their comments. Considering the importance of following an inclusive process, the draft will be taken up for discussion among all key stakeholders, including the Ministry of Defence, pursuant to being submitted for the final approval of the Cabinet of Ministers.

3. Stockpiled Anti-Personnel Mines

As of 28 November 2018, Sri Lanka possessed **77,865** stockpiled anti-personnel mines :(stockpiled and Demolition Plan Annex – 1)

Sri Lanka has established a Committee on Stockpile Destruction made up of senior officials from the Ministry of Defence, Ministry of Foreign Affairs and the Tri-forces to monitor its programme for the destruction of anti-personnel mines, to ensure that destruction respects relevant legislative measures, international obligations and to report as required.

The Government arranged for a demonstration of demolition of Anti-Personal Mine from the national stockpile on Wednesday 25th April 2018 on the margins of the mid-term review workshop on Sri Lanka's National Mine Action Strategy 2016-2020. The demolition took place at sea, and the Hon. Minister of Resettlement, Rehabilitation, Northern Development and Hindu Religious Affairs, Government Officials, Ambassadors and other VIP's participated at this occasion and witnessed the first destruction of Anti-Personnel mines from the Government stocks. This was a symbolic event showcasing Sri Lanka as a leading country in humanitarian mine action. 10 P4 Mark 2 Mines were destroyed using open detonation. With a view to ensuring transparency, members of the diplomatic corps, representatives of the United Nations, non-governmental organizations and stakeholders were invited to witness the destruction event.
Destroyed Mine details are as follows;

TYPE	QUANTITY DESTROYED	LOT NUMBERS	Date of Destroyed	Place of Destroyed

5. Areas known or suspected to contain anti-personnel mines

At end of August 2018, there were 291 areas in Sri Lanka identified to contain anti-personnel mines totalling **24,166,469** square metres and 11 areas suspected to contain anti-personnel mines totalling **1,576,470** square metres. Please see Annex II for a complete list of these areas. Areas known or suspected to contain anti-personnel mines remain in 10 Districts in all three Provinces of Sri Lanka as follows:

Summary of areas known or suspected to contain anti-personnel mines as end of August 2018

Province	District	Number of areas known to contain anti-personnel mines	Number of areas suspected to contain anti-personnel mines	Total number of areas known or suspected to contain anti-personnel mines	Amount of area known to contain anti-personnel mines(square meters)	Amount of area suspected to contain anti-personnel mines(square meters)	Total amount of area known or suspected to contain anti-personnel mines(square meters)

Data Source – Information Management System for Mine Action (IMSMA) Database

Since demining operations started in 2002, Sri Lanka has been able to declare 4,526 areas totalling 1,276,650,256 square metres no longer dangerous due to the presence or suspected presence of anti-personnel mines and is suitable for normal human activity. (See Annex III, Annex IV and Annex V) Areas were released in Districts in three Provinces, with the effort resulting in implementation being declared complete in Northern, Eastern, and North

Central Provinces. In the course of carrying out operations to release these areas, a total of 716,559 anti-personnel mines and 387, 911 other explosive items (i.e., anti-vehicle mines and UXO) were destroyed.

Summary of area and areas released and devices destroyed, 2002 – End of August 2018

Province	District	Cancelled area (square meters)	Reduced area (square meters)	Cleared area (square meters)	Total area released (square meters)	Number of anti-personnel mines destroyed	Number of other explosive items destroyed	Number of areas released
Northern	Jaffna	3,913,285	55,802,696	21,614,232	81,330,213	179,484	33,882	1,275

Sri Lanka has made projections for the year when each of the remaining 302 areas known or suspected to contain anti-personnel mines would be released. At the end of 2020, it is projected that 291 areas will be cleared from anti-personnel mines totalling 24,166,469 square metres and 11 areas suspected to contain anti-personnel mines totalling 1,576,470 square metres will be released in the Northern, Eastern and North Central Provinces.

Summary of projections for the number of areas and the amount of area (square metres) known or suspected to contain anti-personnel mines to be released 2018-2020

All District summaries to be cleared

Sri Lanka has committed Rs. 758,534,964 (US$ $4,450,000 at current exchange rates) per year from 2018 to 2020 for the Army Humanitarian De-mining Unit and Navy Humanitarian De-mining Unit to cover the costs of survey and clearance.

Sri Lanka has committed Rs.**20,000,000(US$ $ 118,497 at current exchange rate**s) per year from 2018 to 2020 to cover the administrative costs of Sri Lanka's Mine Action Centre, Sri Lanka Army Humanitarian De-mining Unit and Sri Lanka Navy Humanitarian De-mining Unit which have responsibilities for priority setting, mine action information management, quality assurance and quality control, coordination with demining organization and cooperation partners, and establishing policy and standards. Sri Lanka can furnish a detailed project proposal outlining its funding needs and expected results to those interested in supporting its efforts to complete implementation of Article 5.

All areas known or suspected to contain anti-personnel mines have been marked with warning signs in Sinhala, Tamil and English are prominently displayed. Warning signs are replaced and maintained on a regular basis. Age-appropriate risk-reduction education has been incorporated into the school curriculum in the Northern and Eastern provinces. In addition, community liaison teams consisting of both women and men regularly visit towns and villages that are most at risk to advise on risk avoidance. Efforts are made to tailor messages according to community circumstances.

Despite best efforts to change high risk behaviour, women, girls, boys and men still fall victim to mines in Sri Lanka, including 02 individuals who were killed and 06 who were injured in 2018.

Sri Lanka is a state that has a responsibility for a high number of landmine survivors.

Number of individuals killed or injured by anti-personnel mines, 1 January – 31 December 2018

8. Victim Assistance

The first mine/ERW related incidents were recorded in 1982 when two incidents occurred with a casualty in each. The figures escalated to 162 incidents which caused 211 casualties in 2001. The numbers dramatically reduced over the years but were slowly raised with the return of the IDP population from 2009 to 2012. The figures for the year 2018 until 31 August is nine Mine/ ERW civilian casualties despite higher numbers of explosive devises were reported by the community members in their resettlement villages. However, in total there is a significant numbers of landmine victims in Sri Lanka, which the government has the responsibility to respond to their needs and rights. This situation is clear evidence for the improvement in Mine Safe behaviour among the effected communities.

UNICEF supported Victim Assistance service providers, albeit at a much lower scale than MRE, Ministries dealing with VA as part of their disability focus or in support of victims of the conflict including the Ministry of Social Services, Ministry of Health, Ministry of Education and Ministry of Defence (Directorate of Rehabilitation).

In Sri Lanka, data on people with disabilities is scarce; data on mine/ERW victims exist. During 2017, Non-Communicable Disease Unit in the Ministry of Health established and rolled out the injury surveillance system at 14 hospitals. During 2018, injury surveillance system was further expanded to 90 hospitals and around 47,939 all forms of child injuries were reported and analysed. This analysed information on child injuries and related causes will feed into on-going policy development and programme design and implementation. In Sri Lanka , free and quality health services are provided to the public. Physical rehabilitative services have improved over recent years but serious gaps remain to be addressed.

In Sri Lanka, the Ministry of Housing and Social Welfareis the lead Ministry for matters pertaining to people with disabilities. Other Ministries, particularly the Ministry of Health, the Ministry of Education and the Ministry of Defence, also address important issues relevant to people with injuries and disabilities. Other main stake holders are INGOs (Handicap International. Motivation, Caritas valvuthyam) and MRE NGOs .

In 2016, Sri Lanka acceded to the Convention on the Rights of People with Disabilities (CRDP) and is bound by its obligations to persons with disabilities including persons who are victims of APMs.

A. Data on direct and indirect victims

Assessment:

On the basis of survey efforts undertaken by various operators, Sri Lanka Mine Action Authority has records of 1,140 individuals injured by anti-personnel mines and other Explosive Remnants of War since the end of the conflict (reported since 2010)in Sri Lanka, with data gender- and age-disaggregated as follows:

Civilian Mine/ERW casualties

Year	**Women**	**Men**	**Girls**	**Boys**	**Totals**
2010	8	17	5	17	47
2011	4	15	0	5	24
2012	6	19	1	21	47

Data Source – Information Management System for Mine Action (IMSMA) Database

During the past 10 years, around 180 civilian casualties were reported due to Mine/ERW incidents. As per the statistics of casualties, it was evident that adult men and boys were more prone/at risk to incidents compared to women and girls. One of the reasons is the free movement of men for livelihood activities compared to women whose movements are restricted within their village boundaries. Also boys enjoy more freedom with their play activities compared to girls.

On the basis of a household survey carried out in the Northern Province in 2012, it is understood that anti-personnel mines or other explosive remnants of war are the source of 4.5%t of all injuries in this province. This

survey also concluded that 12.6% of the population of the Northern Provinces live with a disability. Anti-personnel mines or other explosive remnants of war were the cause of disability for 0.5% of those living with a disability.

Sri Lanka has no data on indirect victims of anti-personnel mines. However, by relating 2013 census data to the geographic location of areas known or suspected to contain anti-personnel mines, it is possible to estimate that approximately 55,000 people live within 500 metres of an area known or suspected to contain anti-personnel mines.

B. Medical care

Assessment:

From the household survey carried out in the Northern Province in 2012, it is known that individuals who suffer traumatic lower limb injuries from causes such as anti-personnel mines / other remnants of war, gun violence, motor vehicle accidents, etc. do not receive adequate services. Moreover, persons with disabilities, including landmine survivors, do not benefit from existing public health services.

When individuals do not get the healthcare services that they need in their districts, long and costly travel to provincial or national healthcare centres is normally required.

While the healthcare costs of low income individuals are covered by the National Health Care Plan, others who are required to obtain private health insurance are regularly discriminated because of their disability.

C. Physical rehabilitation

Assessment:

There are no adequate rehabilitation facilities in most parts of Sri Lanka and very limited prosthetics, orthotists and physical therapists are available in conflict affected and resettlement districts, with all of these facilities located in the capital and the therapists working at the National Physical Rehabilitation Centre. The National Physical Rehabilitation Centre cannot meet existing demand for its services. Moreover, many individuals who come from rural areas, such as landmine survivors, either cannot afford to travel to access these services or cannot spend long periods away from their families or means of income.

Very few INGOs/NGOs are mainly involving in physical rehabilitation services In Northern and Eastern parts of the country.

D. Psychological support

Assessment:

Landmine survivors, as well as others exposed to a stressful event or situation of exceptionally threatening or catastrophic nature, often develop posttraumatic stress disorder. However, standardized screening tools to detect possible symptoms and to suggest the need for a formal diagnostic assessment are not available for use in Sri Lanka. Basic counselling services are available only in the capital and more intensive psychotherapy programmes and unavailable due to a lack of psychiatric specialists in Sri Lanka.

Objectives:

- By working with international partners, basic counselling services to be extended to each provincial capital by the end of 2016.

Enhancements made / to be made to pertinent legislation, policies and plans:

- In 2016, the Ministry of Health proposed a National Mental Health Strategy, drawing in part from the experience of landmine survivors and others in rural areas who have been exposed to a stressful event or situation of exceptionally threatening or catastrophic nature.

-

E. Economic inclusion

Assessment:

From the household survey carried out in the Northern Province in 2012, it is known that the unemployment rate for persons with disabilities, including landmines survivors, is 50 per cent. (Note: The overall average unemployment rate in the Northern Province is 38 per cent.) Poverty is widespread in rural areas, which the Government of Sri Lanka is targeting through its Rural Poverty Reduction Strategy.

F. Social inclusion

Assessment:

- There is an absence of efforts to guarantee the right of persons with disabilities, including landmine survivors, to live independently and to be included in the community, in particular in rural areas.

Coordination

Assessment:

The Sri Lankan Mine Action Authority has represented Sri Lanka in all Convention-related discussions. However, to date, interaction between the Sri Lankan Mine Action Authority and other relevant State entities, particularly the National Disability Council and the Ministry of Health, has been unsatisfactory. Moreover, non-governmental organizations have directly engaged Sri Lanka's cooperation partners on initiatives that may be inconsistent with the priorities established in Sri Lanka's National Action Plan on the Equalization of the Rights of Persons with Disabilities and National Health Care Plan.

Objectives:

- Beginning in 2015, the National Disability Council convened inclusive quarterly stakeholders' meetings to ensure sound coordination in the pursuit of aims related to the implementation of the Convention on the Rights of Persons with Disabilities and the promise made to mine victims through the Anti-Personnel Mine Ban Convention.

Enhancements made / to be made to pertinent legislation, policies and plans:

- By the end of 2015, consultations had been carried out at the provincial level on ways to update the National Action Plan on the Equalization of the Rights of Persons with Disabilities to bring it in line with Sri Lanka's obligations under the Convention on the Rights of Persons with Disabilities.

- By the end of 2016, the National Action Plan on the Equalization of the Rights of Persons with Disabilities was amended, bringing it in line with Sri Lanka's obligations under the Convention on the Rights of Persons with Disabilities.

Results of efforts taken relative to objectives and anticipated enhancements to pertinent legislation, policies and plans:

- In April 2014, the National Disability Council, with the support of the Anti-Personnel Mine Ban Convention's Implementation Support Unit and the United Nations Office of the High Commissioner for Human Rights, staged an inclusive, multi-stakeholder workshop at the national level on updating the National Action Plan on the Equalization of the Rights of Persons with Disabilities. This workshop has provided a template for subsequent inclusive consultations at the Provincial level.

G. Participation

Assessment:

The United Nations Committee on the Rights of Persons with Disabilities has observed that more should be done to include persons with disabilities and their representative organizations in planning, executing and monitoring of public decision-making processes at all levels and, in particular, in the matters affecting them.

Objectives:

- By the end of 2015, persons with disabilities, including landmine survivors where relevant, and their representative organizations were involved in consultations carried out at the provincial level on ways to update the National Action Plan on the Equalization of the Rights of Persons with Disabilities to bring it in line with Sri Lanka's obligations under the Convention on the Rights of Persons with Disabilities.

Enhancements made / to be made to pertinent legislation, policies and plans:

- By the end of 2016, the National Action Plan on the Equalization of the Rights of Persons with Disabilities has been amended to legally require the National Disability Council to consult with persons with disabilities and their representative organizations in planning, executing and monitoring of public decision-making processes.

Results of efforts taken relative to objectives and anticipated enhancements to pertinent legislation, policies and plans:

- In April 2014, the National Disability Council, with the support of the Anti-Personnel Mine Ban Convention's Implementation Support Unit and the United Nations Office of the High Commissioner for Human Rights, sought to address the concerns raised by the United Nations Committee on the Rights of Persons with Disabilities regarding participation by staging an inclusive, multi-stakeholder workshop at the national level on updating the National Action Plan on the Equalization of the Rights of Persons with Disabilities. Results of this activity include that persons with disabilities and their representative organizations perceived that they are central participants in planning, executing and monitoring of public decision-making processes. In addition, this workshop has provided a template for subsequent inclusive consultations at the provincial level.

6. Cooperation and assistance

Not applicable.

Sri Lanka is not a State Party currently in a position to provide assistance to other States Parties.

7. Mine Risk Education

More than three decades of civil war has resulted in significant land contamination by mines/explosive remnants of war (ERW) throughout the North and East of Sri Lanka, threatening people's survival and safety and restricting reconstruction and recovery activities in the area. The total known and estimated extent of contamination to-date in the Northern and Eastern Provinces is 27 square km. The Government of Sri Lanka (GoSL) has prioritised mine clearance tasks for the purpose of resettlement and agriculture, while surrounding jungle and highly contaminated areas that require years of mine clearance work, will be marked off and cleared at a later stage. ERW residual contamination is a long term problem and Mine Risk Education (MRE) is a pre-requisite for safe return as land released via survey, battle area clearance and demining cannot guarantee land without a residual threat.

Mine Risk Education is being conducted through the UNICEF through local NGOs and Ministry of Education (MOE) for school based Mine Risk Education (MRE) and through local NGOs for community based MRE. Since January 2009 to-date, around 500,000 people have been reached by MRE messages in multiple times. The mass media campaign launched in November 2009, had more than doubled the number of MRE facilitators among NGO partners and training has been provided to the Humanitarian Demining Unit (HDU), police officers and Ministry of Education (MoE) staff. Significant efforts were made by UNICEF to incorporate MRE into the school curriculum under 'Life Skills and Civic Education', with approval of the curriculum during 2011. UNICEF supported the MoE and the National Institute of Education in the preparation of MRE-lessons for grades 6-9 and additional teaching materials, and in the training of teachers in high and medium risk areas in the North and East.

As a result of continuous MRE in the Northern and Eastern Province, general levels of understanding the mine/ERW threat and knowing what to do in case of encountering mines, UXO or abandoned ordnance are high. Many people demonstrate mine-smart behaviour by reporting suspected dangerous devices and areas and by educating their family or community members and newcomers on the existing threat and main risk-taking behaviours. All areas known or suspected to contain anti-personnel mines have been marked and warning signs in Sinhala, Tamil and English are prominently displayed. Warning signs are replaced and maintained on a regular basis. In addition, community liaison teams made up of both women and men regularly visit towns and villages that are most at risk to advise women and men on risk avoidance.

Despite best efforts to change high risk behaviour, women, girls, boys and men still fall victim to mines in Sri Lanka, including two individuals who were killed and 7 who were injured in 2018.

However, as many communities live close to infested or not yet fully surveyed areas, the threat in some divisions remains high. Therefore, continuous MRE is needed. In addition, people from the South of the Island have started visiting the North and East and need to learn how to behave mine-smart. Special attention needs to be paid to specific livelihoods such as scrap metal collectors (war scrap), fire wood collectors and farmers who face the highest risks. In addition, special efforts are made to tailor messages according to community circumstances and target groups (e.g., according to the main economic, cultural and recreational activities carried in a particular locality). Therefore, despite the continuing de-mining process, it is a necessity to continue addressing such risks through increased, specific and targeted MRE.
