

SAC Update

OBJECTIVE

- Allow **donors** to rationally apportion funds to places of greatest human need as defined by impact on communities;
- Permit **national authorities** to develop national plans focusing on regions and areas of greatest impact; and
- Give **implementers** baseline impact data that will provide success indicators for mine action programs.

1

GLOBAL LANDMINE SURVEY

Landmines U

Sayed Aqa
Survey Action Center
sac@vi.org

SAC Update - Capabilities

Technical Advisory Team – A specialized SAC team of internationally recognized experts in social science, survey, GIS, and statistics is available to assist with surveys in the field and to help with later analysis.

Planning – National Strategic Mine Action Planning.

13

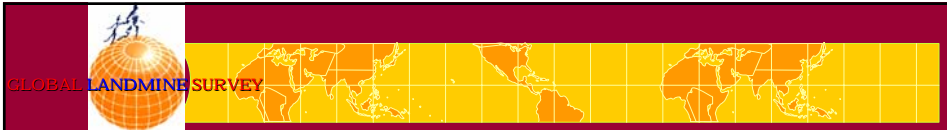

SAC Update - Capabilities

Survey Information – The SAC information management office supports national surveys with map sets and GIS data.

Data Base – The SWG established the principles of Landmine Impact Survey. SAC and UNMAS developed the survey protocols and questionnaire. In cooperation from the Geneva International Centre for Humanitarian Demining, this data set is now integrated into the UN Information Management System for Mine Action (IMSMA). The field module is available for national surveys.

14

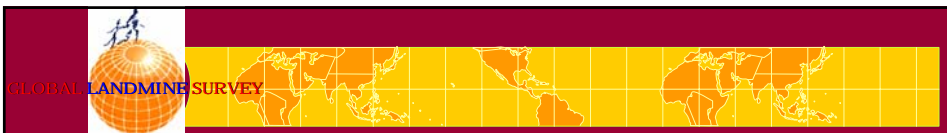

SAC Update - Capabilities

Training – SAC has provided detailed Landmine Impact Survey training to representatives of more than 20 organizations in the donor, UN and NGO communities. SAC will continue to provide this service to organizations preparing to implement surveys.

WorldWideWeb Site – The Global Landmine Survey will maintain a web site allowing access to survey information referenced geographically.
