 - Awareness/attitudes: 3 countries

Indicators: in summary

Input

- Number of victims by sex and age
 - Civilians
 - Sexual abuse
 - Forced displacement
 - Testimonials

Indicators: in summary

Output

- No of beneficiaries by sex and age e.g.
 - Amputees receiving prosthesis
 - No of mobility appliances distributed
 - Access to SER
 - People attending seminars
 - Access to rehabilitation services

Indicators: in summary

Output

- No of services provided e.g.
 - List of equipment provided/distributed
 - No of summer camps- no of participants
 - No of staff trained
 - No of beneficiaries from SER
 - No of DPOs formed
 - No of trainees
 - No of IGPs
 - No of health facilities equipped
 - No of referrals
 - No of victims receiving medical care

Indicators: in summary

Process

- Formation of victim assistance
- Development of MIS – Mine victim data base
- No of monitoring visits
- No of best practices

Indicators: in summary

Outcome

- % of mine victims employed
- % of mine victims self-employed
- % of commercial product or services made by mine victims
- Attitudes/awareness of society about services for victims

Observations re objectives

- Broad spectrum of objectives
- Some broad; some very specific
- Limited attention to:
 - mental health issues
 - legal aid
 - (higher) education
- Some countries seem not to focus on interventions directed at society (disability still seen as an individual problem?)
- Little mention of mainstreaming (or is this equal to inclusion?)

Observations re indicators

- Focus on input, process and output
- Little attention on outcome and impact
- Mix of quantitative/qualitative
- Are they CREAM?

CREAM indicators

- **C**lear Precise
- **R**elevant Appropriate to the subject
- **E**conomic Available at reasonable cost
- **A**dequate Provide sufficient basis to assess performance
- **M**onitorable Amendable to independent validation
