Draft
Implementation Support Unit 2014 work plan and budget

Submitted by the Director of the Implementation Support Unit and endorsed by the Coordinating Committee on 1 November 2013

Background

1. The “Directive by the States Parties to the Implementation Support Unit (ISU)” provides that the ISU shall “propose and present a work plan and a budget for the activities of the ISU for the following year to the Coordinating Committee for endorsement and subsequently to each Meeting of the States Parties or Review Conferences for approval.”

2. The activities of the ISU stem from the mandate of the ISU which was also clarified in the “Directive from the States Parties to the ISU”. This mandate states that the “the ISU shall, in support of the States Parties:

   (a) Prepare, support and carry out follow-up activities from formal and informal meetings under the Convention including Meetings of the States Parties, Review Conferences, Amendment Conferences, intersessional meetings, Standing Committees, the Coordinating Committee and the Article 5 Extension Request Analysing Group.

   (b) Provide substantive and other support to the President, President-Designate, Co-Chairs and Co-Rapporteurs in their work related to all such meetings.

   (c) Provide advice and technical support to States Parties on the implementation and universalization, including on the Sponsorship Programme, of the Convention.

---

1 Document submitted after the established deadline, without editorial changes, and as soon as received by the Secretariat from the Implementation Support Unit.

1 States Parties participating in the Coordinating Committee in 2013 include the following: Algeria, Australia, Austria, Belgium, Bulgaria, Colombia, Ecuador, Mozambique, Netherlands, New Zealand, Nigeria, Norway, Slovenia, Switzerland and Thailand.
(d) Facilitate communication among the States Parties, and promote communication and information regarding the Convention towards States not Party and the public.

(e) Keep records of formal and informal meetings under the Convention, and communicate, as appropriate, the decisions and priorities resulting from such meetings to States Parties and other stakeholders.

(f) Liaise, and coordinate as appropriate, with relevant international organisations that participate in the work of the Convention, including the ICBL, the ICRC, the UN and the GICHD.”

Financial context

3. In accordance with the “Directive from the States Parties to the ISU”, the ISU has prepared a work plan that covers each point in the mandate, for endorsement by the Coordinating Committee and approval by the States Parties at the 13MSP. As was the case in preparing the 2012 and 2013 work plans and budgets, in establishing a work plan and budget for 2014, the ISU has given due regard to the need to maintain its operations at the reduced level of costs and the desire of States Parties that the ISU place a relatively higher priority on certain aspects of its mandate.

• As for 2012 and 2013, the ISU has prepared a budget for 2014 which is below the level of the budgeted expenditures in 2011 (i.e., CHF 1.05 million in 2011 versus CHF 0.98 million forecasted for 2014). Maintaining operations at a reduced level of costs has been achieved by continuing to implement reductions in certain areas, particularly in terms of support to mine-affected States Parties. The regular staff complement continues to be budgeted at 4.1 full time equivalent staff members in 2013 (down from 4.3 full time equivalent staff members in 2011 and 5.3 in 2010). The ISU will continue to draw upon the services of interns and temporary staff, particularly during peak periods of activity.

Priority setting

4. The ISU continues to understand that some States Parties consider that, in a time of financial stress, the ISU should place a relatively greater priority on functions that concern support for the Convention’s implementation machinery and office holders. Accordingly, over 75 per cent of the value of the ISU’s staff time in 2013 will again be allocated to aspects of its mandate other than providing advice and technical support to individual States Parties on the implementation of the Convention.

5. While over 75 per cent of the value of the ISU’s staff time in 2014 will be allocated to aspects of its mandate other than providing advice and technical support to individual States Parties on the implementation of the Convention, the ISU expects to continue to receive numerous requests from States Parties for such support, particularly as concerns the mine clearance and victim assistance provisions of the Convention. In addition, the ISU has regularly received significant financial support that is earmarked for providing victim assistance advisory services, perhaps in recognition of the niche expertise developed by the ISU in advising States Parties on applying, in their national contexts, the victim assistance understandings they have agreed to. As well, the ISU is conscious that the 2006 Seventh Meeting of the States Parties (7MSP) agreed that Article 5 requesting States Parties “are encouraged, as necessary, to seek assistance from the Implementation Support Unit in the preparation of their requests.”
6. Notwithstanding the ISU continuing to support the Presidency and the Universalization Contact Group Coordinator on matters that concern universalization, the ISU will again prioritise support to implementation over support for universalization, particularly when it comes to the use of funds allocated for staff travel.

Activities and expected results

7. In 2014, the ISU will “prepare, support and carry out follow-up activities from formal and informal meetings under the Convention including Meetings of the States Parties, Review Conferences, Amendment Conferences, intersessional meetings, Standing Committees, the Coordinating Committee and the Article 5 Extension Request Analysing Group.” In addition, the ISU will “provide substantive and other support to the President, President-Designate, Co-Chairs and Co-Rapporteurs in their work related to all such meetings.” In keeping with past practice, substantive and other support to the President, President-Designate and Co-Chairs will be the aspect of the ISU’s work that continues to consume the greatest amount of staff resources. The ISU will allocate approximately 54 per cent of the value of its staff resources and 51 per cent of its total budget to activities in this area.

(a) The ISU will prepare, support and carry out follow-up activities associated with approximately six meetings of the Coordinating Committee. As was the case in recent years, the ISU will again stage background briefings for members of the Coordinating Committee early in 2014 to increase their knowledge and capacity. As well, the ISU will support the Co-Chairs in developing strategic plans for their 2013 terms, including by assisting in the preparation of the May 2013 meetings of the Standing Committees. The intended results of these activities include: Coordinating Committee members having the knowledge and tools necessary to perform their functions; Coordinating Committee members possessing the documents and information they need to carry out their business; follow-up carried out further to Coordinating Committee meetings to the satisfaction of the Coordinating Committee; frequent communications are distributed on behalf of the President and President-Designate; and, the President and President-Designate are able to effectively carry out their duties.

(b) The ISU will prepare, support and carry out follow-up activities associated with approximately eight to twelve meetings of the group of States Parties mandated to analyse Article 5 extension requests. In 2014, the ISU is budgeting based on five States Parties requesting extensions and that there will be a need to acquire working translations of requests. Furthermore, an amount has been budgeted for any costs associated with possible requests to acquire for and at the request of the President, Co-Chairs and Co-Rapporteurs “expert mine clearance, legal and diplomatic advice.” The intended results of these activities include: analysing group members having the knowledge and tools necessary to perform their functions; analysing group members possessing the documents and information they need to carry out their business; expert input obtained and provided to the analysing group members; five analyses drafted for the consideration of the analysing group; and, follow-up on the decisions of the analysing group carried out to the satisfaction of the analysing group.

(c) The ISU will provide the support traditionally expected of it in preparing, supporting and carrying out follow-up activities associated with the April 2014 Intersessional Work Programme and Second Preparatory Meeting, and the Third Review Conference. With the Third Review Conference taking place outside of Geneva, the ISU is budgeting on the assumption that the support normally provided by the ISU when formal meetings are held outside of Geneva will again be required. The intended results of these activities include: meeting documents prepared, distributed and otherwise
made available in a timely manner (subject to timely action by the President-Designate and Co-Chairs); Co-Chairs able to carry out (or the ISU, on behalf of Co-Chairs carries out) outreach to individual States to encourage participation (subject to the initiative of Co-Chairs); the President-Designate receives the support necessary to carry out his functions; and, side events well coordinated.

(d) The ISU, as it has done since 2006, will make itself available to the Co-Chairs of the Standing Committee on Victim Assistance to organise victim assistance experts’ programmes. Doing so, however, will only be possible if enhanced funding is made available for any direct costs, such as interpretation. If Co-Chairs do not wish to organise experts’ programmes, the ISU will hold briefings for relevant health care, disability, human rights and other experts. The intended result of these activities include good use having made of the time invested into meetings by States Parties’ relevant health care, disability, human rights and other experts, and their knowledge and capacity enhanced.

8. The ISU in 2014 will “provide advice and technical support to States Parties on the implementation and universalization, including on the Sponsorship Programme, of the Convention”, allocating approximately 23 per cent of the value of staff resources and 28 per cent of its budget to activities in this area.

(a) In keeping with the 7MSP decisions, the ISU will continue to provide assistance to States Parties in the preparation of their Article 5 mine clearance extension requests. At the Third Review Conference, it is assumed that five States Parties will need to have requests considered. In addition, in 2014 three to four States Parties may need to commence work on extension requests in order that they are ready to be submitted for consideration in 2015. As well, some States Parties in 2014 may wish to benefit from the ISU’s advice on reporting completion of Article 5. The intended results of these activities include: high quality requests for extended deadlines submitted soon after the 13MSP; follow-up advice provided to the satisfaction of requesting States Parties; all States Parties which aim to have a request considered in 2015 have made substantial progress in the preparation of their requests by the end of 2014; all States Parties that complete Article 5 implementation prepare high quality declarations of completion; and, increased understanding on the part of States Parties implementing Article 5 regarding relevant provisions of the Convention based on support to the satisfaction of relevant States Parties having been provided.

(b) While the demand for ISU support for advice and technical support on the implementation of Article 5 may be great, the need to reduce costs and the desire of some States Parties to prioritise other matters means that fewer resources have been allocated to carry out Article 5 advisory missions.

(c) In keeping with the clear and unequivocal message of the States Parties at the Cartagena Summit of their reaffirmation of the “fundamental goal” of “promoting and protecting the human rights of mine survivors, and addressing the needs of mine victims, including survivors, their affected families and communities”, in 2014 the ISU will continue to take seriously the emphasis that the State Parties have placed on victim assistance. The ISU will continue to do this with fewer resources that it had at its disposal prior to 2012. However, the ISU stands ready to return to previous levels of support should additional resources be made available. The ISU will aim to follow up on past investments with a view to assisting States Parties in producing tangible outcomes.

(d) The ISU expects, as has been the case in the past, to receive hundreds of inquiries from States Parties on a vast range of matters concerning the implementation of the Convention. The ISU will do its utmost to respond in a prompt manner and to be able to provide responses in English, French or Spanish. Diminished staff resources, however, will
continue to have some impact on the timeliness of responses. The intended result of this activity is that information and support is provided to the satisfaction of States Parties seeking support on various matters concerning the implementation of the Convention.

(e) The ISU will continue to provide advice and support to the Presidency, the Universalisation Contact Group Coordinator and individual States Parties on universalisation. However, as was the case in 2012 and 2013, implementation will receive relatively greater priority than universalisation. The intended results of these activities include that the Universalisation Contact Group Coordinator is able to pursue its priorities in a satisfactory manner.

(f) A proposed strategic plan for the Coordinator of the Sponsorship Programme will be developed twice – once in the lead up to the meetings of the Standing Committees and once in the lead up to the 13MSP. In addition, on-going support will be provided to the Coordinator and the Donors’ Group as a whole. The intended results of these activities are that the Sponsorship Programmes are effectively administered in collaboration with the GICHD.

9. The ISU in 2013 will “facilitate communication among the States Parties, and promote communication and information regarding the Convention towards States not Party and the public”, allocating approximately 10 per cent of the value of its staff resources and 9 per cent of its budget to activities in this area.

(a) Given the need to maintain the reduced level of costs, the ISU, in carrying out its mandate to “facilitate communication…regarding the Convention” will continue to emphasise the use of means that imply little or no direct cost and a minimal amount of staff time. These include maximising the use of the Convention’s website (the support for which is provided on an in-kind basis by the GICHD) and social media. The intended results of activities in this area include the following: the Convention’s website (in English, French and Spanish) is maintained; the Convention has a dynamic presence on social media with numbers of those reached continuing to increase; the ISU participates in the UN’s weekly press briefings when relevant; approximately 10 press releases are prepared and distributed on behalf of the President and individual States Parties; and, press events are staged as relevant.

(b) The ISU will continue to provide professional communications support to the Third Review Conference President-Designate and to the Third Review Conference as a whole. The intended results of activities in this area include the following: a communications plan for the Third Review Conference is prepared and implemented; a separate Review Conference website is maintained; and, press releases prepared and distributed and press events staged for or on behalf of the President-Designate.

(c) The ISU will continue, upon request, to lead seminars and provide training on understanding the Convention and its operations. As was the case in previous years, the ISU will seek, where possible, to recover costs from organisations that make requests for its services. The intended results of activities in this area include the following: the ISU delivers approximately 10 presentations, reaching approximately 250 individuals; and, the ISU continues to enhance and improve its methods of communicating to various audiences about the Convention and its operations.

10. The ISU in 2013 will “keep records of formal and informal meetings under the Convention, and communicate, as appropriate, the decisions and priorities resulting from such meetings to States Parties and other stakeholders”, allocating approximately 6 per cent of the value of its staff resources and 5 per cent of its budget to activities in this area.
(a) The ISU will continue to maintain and enhance the Convention’s Documentation Centre, albeit by relying more on interns to provide the support necessary. The intended result of this activity is that the Documentation Centre is well maintained and accessible to representatives of stakeholders and other interested parties.

(b) The ISU will continue to communicate, as appropriate, the decisions and priorities resulting from the Convention’s meetings, making use wherever possible of low cost but effective means of doing so. The intended result of this activity is that delegations are well-informed about the outcomes of the 13MSP, Preparatory Meetings and the Third Review Conference.

11. The ISU in 2014 will “liaise, and coordinate as appropriate, with relevant international organisations that participate in the work of the Convention, including the ICBL, the ICRC, the UN and the GICHD”, allocating approximately 7 per cent of the value of its staff resources and 7 per cent of its budget to activities in this area.

(a) The ISU will continue its close collaboration with those organisations that historically have played a leading role in supporting the States Parties, namely relevant United Nations departments, agencies and services, the International Campaign to Ban Landmines and its member organisations, the International Committee of the Red Cross and the GICHD. The intended results of activities in this area include that the 2014 Intersessional Work Programme is organized to the satisfaction of the States Parties and that organisational efficiencies are identified.

(b) The ISU will continue to seek to deepen collaboration with actors that are central to disability issues (and hence should be central to the States Parties’ work on victim assistance), including the World Health Organisation, the International Labour Organisation, the United Nations Office of the High Commissioner for Human Rights and non-governmental organisations that have competence in the area of disability rights. The intended results of activities in this area include enhanced interaction between the Convention community and such actors, and the deepening of bridges between the Convention and other arenas where matters important to mine victims are discussed.

Enhanced activities in addition to the Implementation Support Unit’s core work plan

12. In keeping with past practice, the ISU is able to execute other activities, in a manner consistent with its mandate, if additional funds are made available to fully fund these efforts (including funding any additional human resource costs).

13. Subject to availability of additional funding, the 2014 ISU core work plan and budget may be enhanced and expanded in the following areas: (a) assistance to the States Parties to apply the victim assistance provisions of the Cartagena Action Plan, appraisal thereof and lesson-learning from experience; (b) support to national appraisals of States Parties’ efforts in mine clearance as per the Cartagena Action Plan and lesson-learning there from; (c) support to universalisation activities, including a High Level Task Force on Universalization of the Anti-Personnel Mine Ban Convention; and, (d) Support to the use of electronic, visual and other modern media tools to disseminate the commitments made by the States Parties and the Cartagena Conference and to accessibility thereto for persons with disabilities; and, (e) reinforcement of the identity and visibility of the Convention. The ISU will ascertain that any such additional funding will fully cover additional human resources required. The ISU will report to, and update, the Coordinating Committee as well as the 2014 Intersessional Work Programme, on the adjustments that such additional funding may be called for to the core work plan set out in the paragraphs above.
Geneva International Centre for Humanitarian Demining support to the Implementation Support Unit

14. Costs for infrastructure, logistics and administrative services in support of the ISU (i.e., office rent and supplies, information technology and telecommunications, publications and website management, travel services, human resources management, insurance, financial management, and contract and document management), are not included in this budget. These costs are covered by the GICHD general budget, on the basis of funds provided by Switzerland. The general level of support provided in 2014 is intended to be consistent with the level previously provided, with the estimated value of this support amounting to approximately CHF 303,000 in 2014. The estimated value of these activities is a result of monitoring by the GICHD of actual levels of support provided.

15. While costs associated with providing substantive support to the Presidency and Co-Chairs in preparing the Intersessional Work Programme are covered by the ISU budget, costs totalling CHF 180,000 related to facility rental, interpretation (Arabic, English, French, Russian and Spanish) and conference management concerning the Intersessional Work Programme are covered by the GICHD budget, again on the basis of funds provided by Switzerland.

16. While costs associated with providing strategic direction to the Sponsorship Programme are covered by the ISU budget, costs related to the administration of the Sponsorship Programme, including travel and accommodation services as well as reporting and auditing are covered by the GICHD budget, again on the basis of funds provided by Switzerland. The value of these costs is projected to be CHF 50,000 in 2014, based on the assumption that approximately 100 delegates would be sponsored in total.

17. The GICHD can serve to advance funds to the ISU’s operations in periods of cash flow problems. It would also be the last resort in the case of a deficit.

18. As noted in the 2010 evaluation report, a portion of ISU staff time is consumed in providing value-added to the GICHD (which is not discounted from the GICHD’s extrapolation of costs associated with hosting the ISU). The intended results of activities in this area include that the GICHD’s support activities are enhanced through the contribution of ISU expertise.

Contingencies

19. The budget assumes that States Parties will fulfil their commitment to provide the necessary resources to ensure the operations of the ISU. It is expected that the Coordinating Committee will monitor the ISU financial situation at least quarterly in 2014, receiving proposals from the ISU Director on taking contingency actions should insufficient funds be provided in 2014. It is understood that, given the gravity of potential decisions the Coordinating Committee may need to make, proposals for contingency actions would be received well before meeting when they would be discussed.

20. Should it be clear by 30 June 2014 that contributions or commitments made by that time will be insufficient to cover the majority of the costs of the ISU’s 2014 core work plan, the Director of the ISU will propose options to the Coordinating Committee, all of which would result in a significant reduction in the services provided by the ISU. It should be noted that such an action, while perhaps necessary, would be inconsistent with key conclusions contained in 1 September 2010 ISU evaluation report, which noted that “no one actually proposed any reduction of the Unit” and that “a strong wish was evident amongst mine-affected Parties that the ISU should be expanded.”
21. Should sufficient funds be provided in addition to those required to cover the costs of the ISU’s 2013 core work plan, the ISU would first increase in-country Article 5 and victim assistance advisory services. The second priority for the ISU should additional funds be provided would be to revert to communicating about the Convention in a professional manner through publications it has traditionally produced. Finally, if significant additional funds were made available, the ISU would seek to re-staff the position of victim assistance specialist to return to at least the level of State Party-specific advisory services that States Parties benefited from in past years.

Other matters

22. The 2014 work plan and budget does not profile time and associated costs of mobilising resources and servicing the administrative requirements of some contributors. Due to the nature of the ISU’s funding model, an increasing amount of staff time is being consumed to mobilise resources, adapt documentation to meet a variety of contributor’s internal requirements and to comply with multifarious reporting requirements.

| Prepare, support and carry out follow-up activities from formal and informal meetings under the Convention including Meetings of the States Parties, Review Conferences, Amendment Conferences, inter-sessional meetings, Standing Committees, the Coordinating Committee and the Article 5 Extension Request Analyzing Group; Provide substantive and other support to the President, President-Designate, Co-Chairs and Co-Rapporteurs in their work related to all such meetings. | CHF454,262 | CHF40,000 | CHF2,000 | CHF1,000 | CHF499,262 |
|Provide advice and technical support to States Parties on the implementation and universalization, including on the Sponsorship Programme, of the Convention | CHF189,535 | CHF30,000 | CHF50,000 | CHF2,000 | CHF271,535 |
|Facilitate communication among the States Parties, and promote communication and information regarding the Convention towards States not Party and the public. | CHF84,661 | CHF2,500 | CHF5,000 | CHF92,161 |
| Keep records of formal and informal meetings under the Convention, and communicate, as appropriate, the decisions and priorities resulting from such meetings to States Parties and other stakeholders. | CHF47,862 | CHF1,000 | CHF48,862 |
| Liaise, and coordinate as appropriate, with relevant international organizations that participate in the work of the Convention, including the ICBL, the ICRC, the UN and the SGIHD. | CHF838,293 | CHF75,000 | CHF50,000 | CHF5,000 | CHF977,293 |
