State [Party]: ALBANIA reporting for time period from 1 January 2014 to 31 December 2014

1. VICTIM ASSISTANCE

There are at least 991 UXO casualties (150 killed and 841 injured) all over Albania. Desegregation of data by age and gender are available for every prefecture/region of Albania. There is a National Plan aiming to support the mine/UXO victims throughout Albania. The plan complies with several International Treaties ratified by Albania, such as Anti-Personnel Mine Ban Treaty, Convention on Certain Conventional Weapons, Convention on Cluster Munitions and Convention on the Rights of Persons with Disabilities. The implementation of the National Plan contributes to the emergency, medical care, physical rehabilitation, psychosocial support, socio-economic reintegration, data collection, as well as in implementation of relevant laws and policies for all mine/UXO victims throughout Albania.

The capacities to support mines/UXO survivors were created during the previous Albanian Mine Action Programme. These capacities in emergency medical response, medical care, surgical capacities and physical rehabilitation are developed at national and local level and are not serving merely to mine/UXO survivors and other persons with disabilities, but to all people in need.

The Prosthetic Workshop in Regional Hospital of Kukes was upgraded with equipments, raw materials and relevant elements to repair and produce prostheses and orthoses. As result of international donor' support, the Rehabilitation Unit in Kukes Regional Hospital is able to assist mine and UXO survivors as well as other amputees in need for such medical assistance. During 2014, the Prosthetic Workshop at Kukes Regional Hospital was able to support about 38 amputees with new prostheses and 73 others with major repairs.

In 2014, a "Needs Assessment of Socio-Economic and Medical needs of marginalized Explosive Remnants of War (ERW) victims in Albania" was conducted in six regions (Korçë, Elbasan, Durrës, Peshkopi, Gjirokastrë dhe Berat) with the financial support of Austrian Government, and in two other regions (Shkodër, Lezhë) with the financial support of US Government through International

Trust Fund Enhancing Human Security. The assessment focused in reviewing the status of the survivors, identifying their specific needs and drafting due recommendations for the Government to provide them with relevant assistance.

During 2014, 168 UXO/ERW/AXO victims and their families were visited, 126 UXO/ERW/AXO victims were directly interviewed. Current status of the interviewees was documented and thorough analyses of information received, helped to prioritize the needs for further support to the victims.

AMMCO is recording in IMSMA database, all incidents of previously unreported victims and information withdrawn from the needs assessment forms, assembled by ALB-AID during the reporting period.

A project proposal is developed by ALB-AID and submitted to International Trust Fund Enhancing Human Security (ITF), in order to complete the “Needs Assessment of Socio-Economic and Medical needs of marginalized Explosive Remnants of War (ERW) victims” survey, with information about potential UXO/ERW victims in the last three regions of Tirana, Fier and Vlora.

All activities were monitored and coordinated by AMMCO and carried out in cooperation with various implementing partners including the Ministry of Health, Ministry of Welfare and Youth, Kukës Regional Hospital, and Directorates of Public Health, UNDP Albania, International Trust Fund Enhancing Human Security (ITF), University Rehabilitation Institute Republic of Slovenia and the NGO “Albanian Association for Assistance Integration and Development” (ALB-AID).
