<p>A Law on the Implementation of the Convention on Cluster Munitions (CCM) and the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction (Ottawa Treaty)</p>	<p>The Ottawa Treaty was ratified by the Bulgarian National Assembly on 4 September 1998.</p> <p>On 24 November 2015 the National Assembly of the Republic of Bulgaria adopted a Law on the Implementation of the Convention on Cluster Munitions (CCM) and the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction (Ottawa Treaty). The Law entered into force on 8 December 2015. It prohibits any activities with cluster munitions and antipersonnel mines on the territory of the Republic of Bulgaria, except those permitted by the Conventions. The Law establishes legal definitions about Anti-personnel land mines (APLM), transfer and other key terms as well as regulates the conditions and procedures for transfer, transportation and destruction of APLMs and the control over these activities. For the first time a Bulgarian arms control law incorporates principles and rules of international humanitarian law and ensures full realization of the rights of all APLMs victims. The Law provides for assistance to APLMs victims, including medical care, rehabilitation, as well as social and economic inclusion. The assistance includes not only the victims, but also their close relatives.</p> <p>In June 2016, Republic of Bulgaria also amended Articles 337–339 of its Penal Code to establish penal sanctions for violating the prohibitions in the new implementation law on the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on their Destruction (Ottawa Treaty).</p>
