

**CONVENTION ON THE PROHIBITION OF THE USE, STOCKPILING, PRODUCTION AND TRANSFER OF
ANTI-PERSONNEL MINES AND ON THEIR DESTRUCTION**

Reporting Formats for Article 7

The Republic of South Sudan Transparency Report on Article 7

1st January 2017-31st December 2017

Hon.Jurkuck Barach Jurkuch

TelNo. +211954354849/+211925115116 Email:bjurkuch@yahoo.com/okwer_mwony@yahoo.com

Form C Location of mined areas as of 31st December 2016.

On 31st December 2016, South Sudan has a total of 56 areas confirmed to contain anti-personnel (AP) mines and 164 areas suspected to contain AP mine totaling to 220 square meter suspected to contain AP mines

In addition there are 2,579,507 square metres of areas known to contain AP mines and 77,052,215 square meter of areas are suspected to contain AP mines, totaling to 79,631,722 square meter of areas known in South Sudan to contain AP mines as shown in the table 1 below.

Despite increasing insecurity in South Sudan there has been tremendous result on the clearance progress according to the national clearance plan. More support is required from South Sudan to focus on the clearance in order to meet Obligations of the Ottawa Treaty deadline 2021.

NOTE:

There is need for further discussion on how South Sudan may request for extension since South Sudan may not be able to fulfill its obligation by 2021 considering the time frame and level of contamination. .

National Mine Action Authority through consultation will seek support from the government and notify the convention for further approval since NMAA seek to promote substantial commitments to enhance efforts to implement Article 5 of the Convention.

Tables .1.

I. Summary of areas known or suspected to contain anti-personnel mines as of 31 December 2017

State	County	Number of areas known to contain anti-personnel mines	Number of areas suspected to contain anti-personnel mines	Total number of areas known or suspected to contain anti-personnel mines	Amount of area known to contain anti-personnel mines (square metres)	Amount of area suspected to contain anti-personnel mines (square metres)	Total amount of area known or suspected to contain anti-personnel mines (square metres)
Central Equatoria	Juba	19	51	70	990,620	1,405,674	2,396,294
	Kajo-keji	1	2	3	3,500	900	4,400

During 2017 demining season South Sudan work progressively and cancelled 2,043,206 square meter ,reduced 3 square meter ,cleared 9,850,679 square meter and released a total of 11,893,886 square meter through technical and non technical survey . And a total of 1,371 square meter was released including the UXO spots alone.South Sudan also destroyed a total of 734 AP mine and 33,824 Unexploded Ordinance and 42 AT mines from the ten States of South Sudan as shown below in Table 2.

NOTE:

- 1 South Sudan still continue with survey of areas suspected to be contaminated by ERW arising from the recent conflicts hence increasing more hazards that demand clearance. The land release process are implemented in line with National Technical Standards and Guidelines (NTSGs) reviewed on the based International Mine Action Standards (IMAS). All survey areas are either cancelled through non-technical survey or prioritized for technical survey and clearance as reported previously.

Table 2.

II. *Summary of area and areas released and devices destroyed, 1 January – 31 December 2017*

State	County	Cancelled area (square meters)	Reduced area (square metres)	Cleared area (square metres)	Total area released (square metres)	Number of anti- personnel mines destroyed	Number of areas released (Inc luding UXO Spots)	Number of Unexploded ordnance excluding AT and AP	Number of AT Destroyed

Accident and Victim 2017

South Sudan still experienced high number of landmine accident during 2017 compared to 2016. In 2017 a total 25 accident occurred during the demining season that injured 50 people and killed 8 people. The number of mine victim increased by 58 as shown in the table 3 below.

The NMAA, Ministry of Gender, Ministry of health, civil society organizations still faced financial challenges, despite the fact that ICRC, is supporting rehabilitation, there is no proper medical care especially complication that are referred for further management outside South Sudan. Limited or inadequate Social inclusion to empower the victim and economic inclusion of mine victims and other persons with disabilities. The coordination forum has become very small because most organizations are not operational.

NOTE:

Most of landmine victims and other persons with disabilities now experience death as a result of poverty. Majority turned to be street beggars to look for survival that is hard to find. We need funding to help train them in skills to do work and also compete in business sector and generate income to support their family.

Most of the national organization lacks funding to implement their activities that limit their participation in planning, decision making in matters that affects their welfare.

Table 3.

Number of Accident and Victim for year 2017:

State	Accident	Injured	Killed	Victims
Western Bahr El Ghazal	1	2	2	4
Upper Nile	3	4	1	5
Northern Bahr El Ghazal	3	3	3	6
Eastern Equatoria	2	5	0	5
Unity	5	8	0	8
Jonglei	5	12	1	13
Central Equatoria	6	16	1	17
Total	25	50	8	58

MINE RISK EDUCATION TO POPULATION

South Sudan had continued to effectively educate local population with age and gender sensitive mine risk education (MRE) programmes specifically targeting internally displaced persons, at risk community and primary school children.

As already reported MRE is included in national primary school curriculum that is currently officially in used in all government, private, and faithbased schools.

In Decembe 2017 a total of 346,254 beneficiers received MRE 105,903 are boys, 95,375 girls, 70,963 men and 74,013 are womem as shown on the table 4 below.

Despite insecurity in the country there has been increased in the number of population receiving MRE which supported safety movement of the local polutation as well as humanitarian work in South Sudan. MRE activities in South Sudan increased by 287,842 when compared to 2016.

NOTE:

South Sudan requires more fundng to promote MRE activities in all the states .The recent conflicts continues to leave behind more ERW. More emphasis on raising awareness to the local population to promote safety behaviour.

Table 4

III. Number of Population who received MRE in 2017

State	Boys	Girls	Men	Women	Total
Western Bahr El Ghazal	4,238	4,054	3,168	2,929	14,389
Lakes	1,863	1,363	1,201	1,102	5,529
Northern Bahr El Ghazal	932	693	518	521	2,664

Warrap	326	234	347	192	1,099
Out side	0	0	0	0	0
Upper Nile	27,228	25,473	14,335	18,436	85,472
Unity	18,342	16,001	10,251	12,237	56,831
Jonglei	11,398	9,180	5,942	6,201	32,721
Western Equatoria	546	454	568	523	2,091
Eastern Equatoria	2,497	2,472	3,022	1,565	9,556
Central Equatoria	38,533	35,451	31,611	30,307	135,902
Total	105,903	95,375	70,963	74,013	346,254

The tables below shows the states with highly contaminated with AP mine and they are Central Equatoria followed by East Equatoria, Jonglei, Lakes, North Bahr El Ghazal, and Upper Nile, Warrap, West Bahr El Ghazal and West Equatoria states.

The total areas known to contain AP mines is 2,579,507 square meter and 77,052,215 square meters is suspected to contain AP mines. They are located within various payams as shown in table 4 respectively.

NOTE: Annex below the tables are maps of the Republic of South Sudan showing 684 known hazards, 1,576 of AP Hazards closed and 1,371 Hazards closed during 2017 and hazards closed since the beginning of mine clearance.

Table .4
