<sup>&</sup>lt;sup>1</sup> Notes on using the cover page:

<sup>1.</sup> The cover page could be used as a **complement** to submitting detailed forms adopted at the [First and Second] Meetings of the States parties in instances when the information to be provided in some of the forms in an annual report is the same as it would be in past reports. That is, when using the cover page, only forms within which there is new information would need to be submitted.

<sup>2.</sup> The cover page could be used as a **substitute** for submitting detailed forms adopted at the [First and Second] Meetings of the States parties only if all of the information to be provided in an annual report is the same as in past reports.

<sup>3.</sup> If an indication is made on the cover sheet that the information to be provided with respect to a particular form would be unchanged in relationship to a previous year's form, the date of submission of the previous form should be clearly indicated.

Description of the status of programs including:	
Location of destruction sites	Details of:
Military Plant in BAIANO DI SPOLETO	Methods: Pressure APMs in service within the Italian Army (detonators included) and practice
	mines of all types and models were assigned to this Military Plant; AUPS, MAUS, MK2, VAR 40 and PMC (out of order) are the most common
	mines can be summed up as follows:
	- unpacking and dismantling;
	<ul> <li>differentiated salvage of components (explosive, plastic and metallic materials);</li> </ul>
	<ul> <li>grinding of demolition explosive and plastic materials:</li> </ul>
	- recycling or disposal of demolition material by
	private firm.

	Military Plant in NOCETO DI PARMA		
Applicable safety standards: An incinerator for explosives has been installed in the plant for the processing of explosive, as it has no commercial value. The working lines are being installed in rooms equipped with wiring, air pressure and intaking systems suitable for the specific purpose.  Applicable environmental standards: The disposal process, as the facility itself, are in compliance with the current safety regulations and with those concerning environmental protection.	Methods: Warfare wide-range APMs VALMARA 69 were assigned to this Military Plant as a consequence of Decree 1 August 2000. The working cycle can be summed up as follows: - unpacking and dismantling; - differentiated salvage of components (plastic and metallic materials); - cutting of explosive body, destruction of plastic components; - recycling or disposal of demolition material by private firm.	Applicable environmental standards: The disposal process, as the facility itself, are in compliance with the current safety regulations and with those concerning environmental protection. In particular, every attention was paid in order to avoid any soil pollution.	Applicable safety standards: An incinerator for explosives has been installed in the plant, for the processing of detonators and explosive with no commercial value. The working lines have been installed in rooms already equipped with wiring, air pressure and intaking systems suitable for the specific purpose
