

**CONVENTION ON THE PROHIBITION OF THE USE, STOCKPILING, PRODUCTION
AND TRANSFER OF ANTI-PERSONNEL MINES AND ON THEIR DESTRUCTION**

Article 7 Report to the United Nations Secretary General

STATE PARTY: **Canada**

DATE OF SUBMISSION: **2025-05-05**

POINT OF CONTACT: **Global Affairs Canada
Division for Non-Proliferation, Disarmament & Space**

**Tel: +1 343-203-3168
E-mail: ign@international.gc.ca**

REPORTING PERIOD: **January 1, 2024 TO December 31, 2024**

Form A National implementation measures

Article 7.1 "Each State Party shall report to the Secretary-General ... on:
a) The national implementation measures referred to in Article 9."

(In accordance with Article 9, "Each State Party shall take all appropriate legal, administrative and other measures, including the imposition of penal sanctions, to prevent and suppress any activity prohibited to a State Party under this Convention undertaken by persons or on territory under its jurisdiction or control".)

State Party: Canada Reporting for time period from: January 1, 2024 to December 31, 2024

Measures	Supplementary information (e.g., effective date of implementation & text of legislation attached).
No changes were made to existing legislation during the reporting period.	The text of the <i>Anti-Personnel Mines Convention Implementation Act</i> can be found: in English at http://lois-laws.justice.gc.ca/eng/acts/A-11.5/FullText.html or in French at http://lois-laws.justice.gc.ca/fra/lois/A-11.5/TexteComple.html

Form B Stockpiled anti-personnel mines

Article 7. 1 "Each State Party shall report to the Secretary-General ... on:

b) The total of all stockpiled anti-personnel mines owned or possessed by it, or under its jurisdiction or control, to include a breakdown of the type, quantity and, if possible, lot numbers of each type of anti-personnel mine stockpiled."

State Party: **Canada**

Reporting for time period from: **January 1, 2024** to **December 31, 2024**

Type	Quantity	Lot # (if possible)	Supplementary information
	NIL		With the exception of anti-personnel mines retained for the development of and training in mine detection, mine clearance or mine destruction techniques (see Form D), Canada destroyed its stockpiles of anti-personnel mines between October 1996 and November 1997. In 1996 Canada destroyed 63,151 C3A1s and 104 M16A1/2s for a total disposal cost of CDN\$250,670 and in 1997 Canada destroyed 18,004 C3A2s and 11,292 M16A1/2s for a total disposal cost of CDN\$153,002. The average cost was CDN\$4.36 for each mine destroyed.
TOTAL	NIL		

Form C Location of mined areas

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

c) To the extent possible, the location of all mined areas that contain, or are suspected to contain, anti-personnel mines under its jurisdiction or control, to include as much detail as possible regarding the type and quantity of each type of anti-personnel mine in each mined area and when they were emplaced."

State Party: Canada Reporting for time period from January 1, 2024 to December 31, 2024

1. Areas that contain mines

Location	Type	Quantity	Date of emplacement	Supplementary information																								
There are no areas in Canada that contain live anti-personnel mines. Canadian Forces Base (CFB) Suffield, Alberta contains two mined areas (with mines that have been defused) for research and development of mine clearance equipment and procedures. Locations of corners of mined areas are given in UTM Grid References. A. Mine Pen <table><tr><td>SW Cnr</td><td>491569</td><td>5571199</td></tr><tr><td>SE Cnr</td><td>491910</td><td>5571214</td></tr><tr><td>NE Cnr</td><td>491912</td><td>5571684</td></tr><tr><td>NW Cnr</td><td>491571</td><td>5571685</td></tr></table> B. 1. b) Voluntary Information (Maputo Action Plan)

Objectives	Activity/Project	Supplementary Information: <i>(a) actual use, for permitted purposes, during the previous calendar year, of retained anti-personnel mines; (b) plans for the use, for permitted purposes, of retained anti-personnel mines; and (c) an explanation of any increase or decrease in the number of retained anti-personnel mines.</i>
Force Protection Evaluation		Canada retains live anti-personnel mines to study the effect of blast on equipment, to train soldiers on procedures to defuse live anti-personnel mines and to demonstrate the effect of landmines. For example, live mines help determine whether suits, boots and shields will adequately protect personnel who clear mines. The live mines are used by the Defence department's research establishment located at Suffield, Alberta and by various military training establishments across Canada. The Department of National Defence represents the only source of anti-personnel mines, which can be used by Canadian industry to test equipment. As of December 2022, Canada has 1475 AP mines in its inventory. A variety of anti-personnel mines are necessary for training soldiers in mine detection and clearance. Counter-mine procedures and equipment developed by Canada's research establishment must also be tested on different types of mines members of the Canadian Armed Forces or other organizations might encounter during demining operations. The Department of National Defence retains a maximum of 2000. This number is to ensure we have a sufficient number of mines for training and for valid testing in the area of mine detection and clearance. Canada will continue to conduct trials, testing and evaluation as new technologies are developed. There will be a continuing requirement for provision of real mine targets and simulated minefields for research and development of detection technologies.

Form E Status of programs for conversion or de-commissioning of APM production facilities

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

e) The status of programs for the conversion or de-commissioning of anti-personnel mine production facilities."

State Party: **Canada** Reporting for time period from: **January 1, 2024** to **December 31, 2024**

Indicate if to "convert" or "decommission"	Status (indicate if "in process" or "completed")	Supplementary information
	Completed	Canada has no additional information on the conversion or de-commissioning of anti-personnel mine production facilities. Please see previous reports for such information.

Form F Status of programs for destruction of APMs

Article 7.1 "Each State Party shall report to the Secretary-General ... on:
 f) The status of programs for the destruction of anti-personnel mines in accordance with Articles 4 and 5, including details of the methods which will be used in destruction, the location of all destruction sites and the applicable safety and environmental standards to be observed."

State Party: Canada Reporting for time period from: January 1, 2024 to December 31, 2024

1. Status of programs for destruction of stockpiled APMs (Article 4)

Description of the status of programs: With the exception of anti-personnel mines retained for the development of and training in mine detection, mine clearance or mine destruction techniques (see Form D), Canada destroyed its stockpiles of anti-personnel mines between October 1996 and November 1997. All anti-personnel mines were destroyed at a Canadian Forces base in Dundurn, Saskatchewan except for a small number destroyed at a stockpile destruction ceremony held in November 1997 near Ottawa. Alternating layers of small numbers of mines and expired explosive material were placed in a pit and then blown up. The process was then repeated. The estimated cost of destroying the anti-personnel mines was CDN\$403,672.00. Destruction of anti-personnel mines was carried out in accordance with standard environmental and safety procedures.	
Location of destruction sites	
	Methods
	Applicable safety standards
	Applicable environmental standards

2. Status of programs for destruction of APMs in mined areas (Article 5)

Description of the status of programs: With the exception of two mined areas, contained within Canadian Forces Base Suffield, Alberta (with mines that have been defused) for research and development of mine clearance equipment and procedures, there are no areas in Canada that contain anti-personnel mines.	Details of:
Location of destruction sites	
	Methods
	Applicable safety standards
	Applicable environmental standards

Form G APMs destroyed after entry into force

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

g) The types and quantities of all anti-personnel mines destroyed after the entry into force of this Convention for that State Party, to include a breakdown of the quantity of each type of anti-personnel mine destroyed, in accordance with Articles 4 and 5, respectively, along with, if possible, the lot numbers of each type anti-personnel mine in the case of destruction in accordance with Article 4"

State Party: Canada Reporting for time period from: January 1, 2024 to December 31, 2024

1. Destruction of stockpiled APMs (Article 4)

Type	Quantity	Lot # (if possible)	Supplementary information

Form I Measures to provide warning to the population

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

i) The measures taken to provide an immediate and effective warning to the population in relation to all areas identified under paragraph 2 of Article 5."

(In accordance with Article 5, para.2: "Each State Party shall make every effort to identify all areas under its jurisdiction or control in which anti-personnel mines are known or suspected to be emplaced and shall ensure as soon as possible that all anti-personnel mines in mined areas under its jurisdiction or control are perimeter-marked, monitored and protected by fencing or other means, to ensure the effective exclusion of civilians, until all anti-personnel mines contained therein have been destroyed. The marking shall at least be to the standards set out in the Protocol on Prohibitions or Restrictions on the Use of Mines, Booby-Traps and Other Devices, as amended on 3 May 1996, annexed to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects".)

State Party: Canada reporting for time period from January 1, 2024 to December 31, 2024

With the exception of two mined areas, contained within Canadian Forces Base Suffield, Alberta (with mines that have been defused) for research and development of mine clearance equipment and procedures, there are no areas in Canada that contain anti-personnel mines. Hence, providing an immediate and effective warning to the population in relation to all areas identified under paragraph 2 of Article 5 of the Convention does not apply to Canada.

Form J Other relevant matters

The following provides information on mine action activities supported by Canada to assist States in the implementation of the Ottawa Convention, the Convention on Cluster Munitions and the Convention on Certain Conventional Weapons.

SECTION 1 – Care

(includes programs, training, equipment, and transport for emergency medical care, continuing hospital care, amputation surgery, post-surgery medical care related to amputation or treatment of other landmine-related trauma)

FY 2024-24

Activity, funding and/or in-kind contributions	Implementing organization or agency
<u>Type(s) of Activity:</u> <u>Contribution:</u> <u>Country:</u> <u>Period:</u>	

SECTION 2 – Rehabilitation

(includes programs, training, equipment, and transport for physical rehabilitation such as physiotherapy, prosthetics and other assistive devices, and training/education of personnel in these fields; may also include psychological interventions attached to the medical system)

FY 2024-24

Activity, funding and/or in-kind contributions	Implementing organization or agency
<u>Type(s) of Activity:</u> <u>Contribution:</u> <u>Country:</u> <u>Period:</u>	

SECTION 3 – Social Reintegration

(includes psychological support to landmine survivors and/or their families, support to associations of people with disabilities, peer groups, peer counseling, support to sports programs for disabled participants and the training of relevant personnel such as social workers, therapists, and peer counselors to provide these services. Also includes development of appropriate disability policy and practices)

FY 2024-24

<u>Activity, funding and/or in-kind contributions</u>	<u>Implementing organization or agency</u>
