Therefore, the area was not considered a ‘mined area’ at the time of discovery in November 2023.</p> <p>An assessment was made that clearly indicated that the find at Hell’s Kitchen did not imply the presence of other irregular or unpredictable mining at other locations.</p> <p>After the successful planning, logistical processing, assessment, de-mining and recovery of the area, the mines were destroyed by controlled incineration on 3 April 2024. The residue of that disposal was confirmed fully incinerated, contained no energetic materials and no part could be recognised as having been part of a mine by the EOD Adviser and was deposited appropriately.</p> <p>The area was confirmed cleared and safe and the APMs destroyed on 11 April 2024.</p>
