**Form A          National implementation measures**

Article 7.1          "Each State Party shall report to the Secretary-General ... on:

a) The national implementation measures referred to in Article 9."

**Remark:** In accordance with Article 9, "Each State Party shall take all appropriate legal, administrative and other measures, including the imposition of penal sanctions, to prevent and suppress any activity prohibited to a State Party under this Convention undertaken by persons or on territory under its jurisdiction or control".

**State [Party]:**    Angola reporting for time period from          **January 2025 to December 2025**

Measures: Supplementary information (e.g., effective date of implementation & text of legislation attached).

No legal, administrative and other measures were adopted within the period under consideration. The existing pieces of legislation in the main legal and judicial system of Angola (Constitution, penal code, civil code, family code and others) are sufficient to charge, prosecute and punish any national or foreign citizen who uses, produces, transfers, stores or encourages others to use antipersonnel mines within Angolan territory.

**Form B Stockpiled anti-personnel mines**

Article 7. 1 "Each State Party shall report to the Secretary-General ... on:

b) The total of all stockpiled anti-personnel mines owned or possessed by it, or under its jurisdiction or control, to include a breakdown of the type, quantity and, if possible, lot numbers of each type of anti-personnel mine stockpiled."

State [Party]: Angola reporting for time period from January 2025 to December 2025

<i>Type</i>	<i>Quantity</i>	<i>Lot # (if possible)</i>	<i>Supplementary Information</i>
N/A	N/A	N/A	<p>Angola has completed the destruction of all stockpiled anti-personnel mines fulfilling in this way with article 4 within its deadlines (January 2007). This process was implemented by the Angola Armed Forces together with UNDP technical advisory and the direct coordination of ANAM.</p> <p>During the process many types and quantities of landmines were destroyed and further reported in form G.</p>
Total			

**Form C Location of mined areas**

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

c) To the extent possible, the location of all mined areas that contain, or are suspected to contain, anti-personnel mines under its jurisdiction or control, to include as much detail as possible regarding the type and quantity of each type of anti-personnel mine in each mined area and when they were emplaced."

State [Party]: Republic of Angola reporting for time period from January 2025 to December 2025

**Form I Measures to provide warning to the population**

Article 7.1 "Each State Party shall report to the Secretary-General ... on:

- i) The measures taken to provide an immediate and effective warning to the population in relation to all areas identified under paragraph 2 of Article 5."

*Remark:* In accordance with Article 5, para.2: "Each State Party shall make every effort to identify all areas under its jurisdiction or control in which anti-personnel mines are known or suspected to be emplaced and shall ensure as soon as possible that all anti-personnel mines in mined areas under its jurisdiction or control are perimeter-marked, monitored and protected by fencing or other means, to ensure the effective exclusion of civilians, until all anti-personnel mines contained therein have been destroyed. The marking shall at least be to the standards set out in the Protocol on Prohibitions or Restrictions on the Use of Mines, Booby-Traps and Other Devices, as amended on 3 May 1996, annexed to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects".

State [Party]: Republic of Angola Reporting for time period from January 2025 to December 2025

The use of signs to warn the public about the danger of landmines has been a common practice when suspected areas are identified. Areas confirmed by non-technical and technical surveys have been marked to prevent the public from accessing them. Demining operators have played a leading role in warning affected populations during Explosive Ordnance Risk Education sessions.

Explosive Ordnance Risk Education (EORE) activities were conducted by the National Demining Centre (CND) and mine action NGOs across six provinces. The total number of beneficiaries reached increased by 39 per cent compared to 2024.

According to available data, a slight decrease in the number of incidents was recorded compared to the previous year; however, the total number of casualties increased, with the majority being men and boys. Gender parity was observed among participants in EORE sessions. Evidence indicates that most incidents occur when individuals handle unstable explosive ordnance while attempting to collect scrap metal for sale as a means of livelihood. This activity is predominantly undertaken by men, who are generally the primary income earners within their households.

**Form J Other relevant matters**

Remark: States Parties may use this form to report voluntarily on other relevant matters, including matters pertaining to compliance and implementation not covered by the formal reporting requirements contained in Article 7. States Parties are encouraged to use this form to report on activities undertaken with respect to Article 6, and in particular to report on assistance provided for the care and rehabilitation, and social and economic reintegration, of mine victims.

State [Party]: Republic of Angola Reporting for time period from January 2025 to December 2025

The Republic of Angola remains committed to fulfilling its obligation to clear all known mined areas under its jurisdiction by 2030. In this regard, sustained efforts are being made to implement the recommendations of the Committee on Article 5 Implementation in relation to Angola’s request for an extension. Demonstrating its political will to meet this commitment, the Government has allocated dedicated funding within the General State Budget to support the achievement of this objective within the established timeframe.

The National Mine Action Agency (ANAM) continues to strengthen its institutional and operational capacity to effectively discharge its mandate as the national authority for mine action, including leading and coordinating efforts towards the completion of clearance of anti-personnel mines and other explosive ordnance across the national territory.

The engagement of national public demining operators, notably the Demining Brigades of the Angolan Armed Forces (FAA) and the National Demining Centre (CND), in the clearance of mined areas recorded in the national database constitutes a critical factor in achieving completion. This is due not only to their nationwide deployment across all provinces, but also to their substantial operational capacity, including the largest available demining workforce in the country. Moreover, their continued involvement is essential to ensuring a smooth transition to, and sustainability of, residual risk management in the post-completion phase.

With regard to contamination, a further slight increase was recorded. However, no new mined areas were identified in the provinces of Huambo and Zaire, while contamination levels in the provinces of Benguela and Cuanza Norte remain comparatively low.

The Republic of Angola expresses its sincere appreciation to international donors, in particular the Governments of the United States of America, the United Kingdom, Belgium, Norway, Japan and Switzerland, for their sustained and valuable contributions towards addressing the landmine problem, enhancing the safety of affected populations, and advancing progress towards sustainable development.

**Assistance to Victims**

Victim assistance activities continued to be implemented by both public institutions and civil society organizations.

In the area of vocational training, notable progress includes the provision of training in Malanje to 15 persons with disabilities, including survivors of explosive ordnance, comprising 11 men and 4 women. The training covered a range of trades, including bricklaying, plumbing, bookkeeping, tailoring, electrical work and mechanics.

In the areas of medical care, social support and physical rehabilitation, assistance was provided to 99 persons with disabilities, including survivors of explosive ordnance, comprising 98 men and 1 woman. The services delivered included home-based support, provision of mobility aids (including crutches and related assistive devices), medical treatment, physical rehabilitation, distribution of food parcels, and second-hand clothing.

In addition, support was extended to families of former combatants who lost their lives as a result of landmine incidents, including the provision of coffins.

**Form J** (continued)

In Mexico Province, the Eastern Region Physical Rehabilitation Centre in Luena recorded the following outcomes:
