States Parties are encouraged to use this form to report on activities undertaken with respect to Article 6, and in particular to report on assistance provided for the care and rehabilitation, and social and economic reintegration, of mine victims.

State [Party]: Ireland reporting for time period from 01/01/2025 to 31/12/2025

[Narrative / reference to other reports:]

The Irish Defence Forces is the only entity authorised to retain mines for permitted purposes. The Irish Defence Forces use live anti-personnel mines in the development and validation of mine render safe procedures and in training personnel in these procedures. Render safe procedures normally involve the destruction of the mine. Live mines are also used as part of the testing and validation of mechanical mine clearance equipment and in the training of personnel in the use of such equipment. Minimum metal content mines are used, as required, in the calibration and testing of mine detection equipment.

The Irish Defence Forces maintain a capability to survey, search for, detect, clear and destroy landmines. This capability includes many types of detection equipment, mechanical clearance assets, disposal experts and specialist search and clearance teams. The Defence Forces also continues to provide qualified personnel to territories affected by ERW as advisors and technical experts on search and clearance operations.

The Irish Defence Forces have deployed a mine clearance capability, including mechanical clearance assets, to the UNIFIL mission throughout 2025 and continues to participate in a European Defence Agency (EDA) project to enhance military search capabilities.
