

**CONVENTION ON THE PROHIBITION OF THE USE, STOCKPILING,
PRODUCTION AND TRANSFER OF
ANTI-PERSONNEL MINES AND ON THEIR DESTRUCTION**

Report for Article 7

The Republic of South Sudan Transparency Report on Article 7

January 2014 - 31 December 2014

Contact Person: Mr. Jurkuch Barach Jurkuch,
South Sudan National Mine Action Authority

Form A National implementation measures

No additional legal, administrative and other measures were taken during the previous calendar year to prevent and suppress any activity prohibited under the Convention.

Form B Stockpiled anti-personnel mines

Not Applicable

Form C Location of mined areas as of January 2014 - 31 December 2014

As of 1 January - 31 December 2014, the information available indicated that there are a total of 310 areas suspected to contain anti-personnel mines with an estimated area of 95,819,427 square meters remaining to be addressed in the 10 states of South Sudan from the level of boma, payam up to the county, as shown on the table below.

Table 1. Summary of areas known or suspected to contain anti-personnel mines as of 31 December 2014

State	County	Number of areas known to contain anti-personnel mines	Number of areas suspected to contain anti-personnel mines ¹	Total number of areas known or suspected to contain anti-personnel mines	Amount of area known to contain anti-personnel mines(square metres)	Amount of area suspected to contain anti-personnel mines(square metres)	Total amount of area known or suspected to contain anti-personnel mines(square metres)

Map 1: Locations of Known or Suspected Anti-Personnel Mine as of December 2014

Map 2: Known Suspected Hazards as of 31 December 2014

Form D Anti-Personnel Mines retained or transferred

The Republic of South Sudan does not retain or transfer anti-personnel mines for permitted purposes.

Form E Status of programs for conversion or de-commissioning of APM production facilities

Not applicable.

Form F Status of programs for destruction of APMs

All identified and discovered stockpiles of anti-personnel mines are destroyed using the relevant procedures mentioned in the National Technical Standards and Guidelines. It is done by the implementing partner on the ground but recorded for future information keeping in the Information Management System for Mine Action (IMSMA) database.

2. Status of programs for destruction of APMs in mined areas (*Article 5*)

Table 2. Summary of area and areas released and devices destroyed, 1 January – 31 December 2014

State	County	Cancelled area (square metres)	Cleared area (square metres)	Total area released (square metres)	Number of anti-personnel mines destroyed	Number of other explosive items destroyed ²	Number of areas released

All States		1,133,571	8,190,190	9,323,761	880	15,602	1320

Article 5

The progress report from 1 January – 31 December 2014 shows that there were **880 anti-personnel mines destroyed; 15,602 unexploded ordnance (UXO) destroyed (including anti-tank mines); 9,323,761 square meters released; 1,133,571 square meter cancelled; 1,320 areas released; and 8,190,190 square meters cleared** in all 10 states as shown in Table 2 above.

The **9,323,761 square meters released** includes all explosive ordnance disposal, battle area clearance (sub-surface and surface) battle areas released, cancelled, manual mine clearance, mechanical clearance, mine detection dogs, and mined areas released and cancelled by Non-Technical Survey.

The number of all **unexploded ordnance destroyed (15,602) does not include the number/quantity of Small Arms Ammunition destroyed. The amount of road opened during 2014 was 2,013 kilometres.**

All land release efforts are carried out based on South Sudan National Technical Standards and Guidelines (NTSGs) which are based on the most up-to-date mine action Standards.

Summary of projections for the amount of area known or suspected to contain anti-personnel mines to be released 2015-2017

South Sudan will undertake the development of a multi-year clearance plan which takes into consideration the known hazardous areas, historical patterns for resources available to the mine action sector, as well as the prevailing operational and security environment in various regions of the country. The plan will be published in subsequent Article 7 reports and updates will be provided to States Parties.

Form G Anti-Personnel Mines destroyed after entry into force

Article 4

Not Applicable

Form H Technical characteristics of each type produced/owned or possessed

South Sudan does not produce/own or possess any type of anti-personnel mine.
The different types of mines found and destroyed during clearance operations are shown below.

Types of Mine Found In South Sudan

OZM -4	VS -50

Form I Measures to provide warning to the population

All suspected hazards are surveyed and marked by mine risk education (MRE) teams or clearance teams with international signs and are located in the map and recorded in IMSMA.

A Landmine Impact Survey and other surveys done have been completed; and through Non – Technical Survey and technical survey, land has been either cancelled or prioritized for clearance. All cleared minefields are marked ‘cleared’ in the map to promote other activities like livelihoods, infrastructural development, road construction, etc.

For South Sudan, MRE is prioritized in IDP and returnees settlements and schools; and the National Mine Action Authority works with the United Nations Mine Action Service (UNMAS) to train and accredit all MRE teams according to NTSGs. After deployment, the NMAA and UNMAS conduct joint field visits for Quality Assurance (QA). All MRE team compositions are gender sensitive. Awareness sessions within communities and schools are organized and the number of beneficiaries is counted in sex disaggregated figures as shown in the table below.

Mine Risk Education is being provided to communities and at-risk populations in all ten states. There are international NGOs, contracted companies, national NGOs and community-based organizations facilitating MRE. The following are the organizations that are delivering MRE: Danish Demining Group; Mine Advisory Group; Dan Church Aid; G4S; MineTech International; The Development Initiative; South Sudan Integrated Mine Action Service; Operation Saves Innocent Lives; MTT; CMI; CINA; and CHORM.

ACHIEVEMENTS

In 2015, South Sudan managed to include MRE into the primary school curriculum. With the Ministry of Education Science and Technology, supported by UNICEF, the teacher’s guidebooks will be launched officially for use in all public and private primary schools and teacher training colleges to help ensure the information reaches the majority of at-risk children living in suspected communities.

From 1 **January –31 December 2014**, **167,655** people receive MRE in South Sudan.

State	Boys	Girls	Men	Women	Total
West Bahr El Ghazal	1,323	1,007	536	460	3,326
Lakes	7,107	5,649	5,283	5,907	23,946

Unity	2,727	2,222	874	1,632	7,455
Jonglei	14,364	12,382	11,523	12,273	50,542
West Equatoria	4,646	3,988	2,766	2,578	13,978
East Equatoria	12,282	11,274	6,158	5,646	35,360
Central Equatoria	7,957	4,801	4,492	3,466	20,716
Total	54,892	45,214	33,390	34,159	167,655

Form J Other Relevant Matters

There has been an increase in the number of landmine and ERW accidents in South Sudan from 2012 to date.

From **January -December 2014**, South Sudan **recorded 38 new victims** of anti-personnel mines/Explosive Remnant of War from five states. Thirty-one people were injured and seven were killed.

The South Sudan National Mine Action Authority, the Ministry of Gender, Child and Social Welfare, the Ministry of Health, civil society groups, the ICRC, UNMAS, Handicap International, and the Victim Assistance disability organization work together to deliver medical, physical rehabilitation, psychological support and socio-economic services to mine and other persons with disability. There is a coordination forum that is chaired by the Director General of Victim Assistance, Ministry of Gender and co-chair by the Director Victim Assistance, National Mine Action Authority.

ACHIEVEMENTS

South Sudan ratified the Convention on the Rights of Persons with Disability and developed a draft national disability policy to protect the rights of all persons with disability. The policy is

still with Parliament waiting for approval. During April 2014-March 2015 there were 11 training workshops conducted on awareness and approximately 300 participants benefited.

There were 24 referrals and transportation to the Juba Prosthetics and Orthotic Center for people from Yei, Central Equatoria State. They supported 559 with rehabilitation services (mobility devices) to persons with disability.

There were 100 persons with disability trained in small business skills and provided with incomes for income generating activities. The trainings covered the following areas: vegetable planting, bicycles machines, and restaurants business.

In Bakhita Health Center and other health center in Yei, training was provided to nurses to promote early identification, early prevention basic rehabilitation and mobility skills.

CHALLENGES

There is no UN agency taking a lead in supporting Victim Assistance at the moment; all implementing partners seek their own funding to support their activities.

Table 3 Number of Victims from 1 January to 31 December 2014
