

Sudan is one of the first six countries who signed and ratified the CRPD, Sudan participated effectively in most of the Ad- HOC meeting of the CRPD. Sudan developed National disability law in light of the CRPD.

Being one of the highly effected countries with the contamination of land mine, In Sudan we are using VA as a window of opportunity for broader disability related issue from human rights approach

NMAC in collaboration with MOSA and technical and financial support of UNMAO starting the implementation of CRBD , we started by establishing the higher council for disability

I think all conventions should be use for the maximum benefit of the person with disabilities

Sudan insure its commitment on implementing coherent VA following CAP and CRPD
