

ACTIVITY PLAN

on Humanitarian Demining of Liberated Territories of Donetsk and Luhansk regions for 2020

Purpose:

1. Reducing the risks for the population of Ukraine related to mines and explosive remnants of war.
2. Clearance of the liberated territory of Donetsk and Luhansk regions from explosive objects.

Key objectives:

1. Conduct preparatory activities to ensure the demining of contaminated areas.
2. Carry out humanitarian demining of territories and facilities of the liberated territory of Donetsk and Luhansk regions.
3. Implementation of quality control of the cleared areas.
4. Organization of international cooperation on anti-mine activities.

| Item No. | Name of tasks and activities | Implemented by | Deadline | Notes |
|------------------------------|--|---|----------------------------|-------|
| 1. General activities | | | | |
| 1.1. | Development of information management system for anti-mine activities | Ministry of Defence, SESU, SSTS with the assistance of OSCE | During 2019 | |
| 1.1.1. | Conducting meetings with operators of the information management system | Ministry of Defence, SESU, SSTS with the assistance of OSCE | According to separate plan | |
| 1.2. | Provide prompt response to reports on the detection of explosive items by locals | SESU, AF of Ukraine, SSTS, local self-government agencies | Constantly | |
| 1.3. | Ensuring the implementation of tasks for the demining of territories and infrastructure as part of the forces and facilities involved in the operation of the Joint Forces in the territory of Donetsk and Luhansk regions | Joint Operation Headquarters of the Armed Forces of Ukraine, Headquarters of JFO (OTC), divisions of central executive agencies and other units involved in JFO | Constantly | |

| Item No. | Name of tasks and activities | Implemented by | Deadline | Notes |
|------------------------------------|--|----------------|------------|-------|
| 2. Non-technical inspection | | | | |
| 2.1. | Conducting a non-technical inspection of the area and infrastructure facilities on the liberated territory of Donetsk and Luhansk regions, where divisions of AF of Ukraine and other military units carry out tasks related to JFO (with the exception of mine explosion barriers of the system of engineering barriers of JFO) | AF of Ukraine | Constantly | |
| 2.2. | Conducting a non-technical inspection of the area and infrastructure facilities under the control of the Ukrainian authorities in the territories of Donetsk and Luhansk regions, including in inland waters and the water area of the Sea of Azov and in the areas specified in the appendix (except for areas where the divisions of AF of Ukraine, other military units perform tasks related to the JFO and territories designated for non-governmental organizations that coordinate the conduct of work in the specified areas with the Headquarters of JFO) | SESU | Constantly | |
| 2.3. | Conducting a non-technical inspection on the facilities of the transport system of the liberated territories of Donetsk and Luhansk regions | SSTS | Constantly | |

| Item No. | Name of tasks and activities | Implemented by | Deadline | Notes |
|----------|--|--|--------------------------|-------|
| 2.4. | Conducting a non-technical inspection by non-governmental organizations under the coordination of the Ministry of Defense in the plots specified in the appendix (in agreement with the Headquarters of JFO) in the territory of Donetsk and Luhansk regions | Non-governmental organizations | Under a special decision | |
| 2.5. | Marking of suspicious and hazardous plots detected during the conduct of non-technical inspection of territories, informing regional MCA about the establishment of a marking system to monitor the technical state of marking systems for further information on the need for their service | Forces and means of JFO, SESU, SSTS and other demining organizations | When detected | |
| 2.6. | Maintenance of systems of marking of suspicious and hazardous plots detected during the conduct of non-technical inspection of territories | Forces and means of JFO, SESU, SSTS and other demining organizations | Constantly | |
| 2.7 | Submission of reports on the abolition of high-priority areas for non-technical inspections provided by regional military-civil administrations, for which there is no confirmed direct and indirect evidence of contamination | Forces and means of JFO, SESU, SSTS and other demining organizations | Until May 1, 2020 | |

| Item No. | Name of tasks and activities | Implemented by | Deadline | Notes |
|--------------------------------|---|--|--------------------|-------|
| | by mines and explosive remnants of war | | | |
| 2.8 | Submission of reports on the abolition of areas of normal priority for non-technical inspections provided by regional civil-military administrations, for which there is no confirmed direct and indirect evidence of contamination by mines and explosive remnants of war | Forces and means of JFO, SESU, SSTS and other demining organizations | Until June 1, 2020 | |
| 3. Technical inspection | | | | |
| 3.1. | Conducting a technical inspection of the area and infrastructure facilities on the liberated territory of Donetsk and Luhansk regions, where divisions of AF of Ukraine and other military units carry out tasks related to JFO (with the exception of mine explosion barriers of the system of engineering barriers of JFO) | AF of Ukraine | Constantly | |
| 3.2. | Conducting a technical inspection of the area and infrastructure facilities under the control of the Ukrainian authorities in the territories of Donetsk and Luhansk regions, including in inland waters and the water area of the Sea of Azov and in the areas specified in the appendix (except for areas where the divisions of AF of Ukraine, other military units perform tasks related to the JFO and | SESU | Constantly | |

| Item No. | Name of tasks and activities | Implemented by | Deadline | Notes |
|---|---|--------------------------------|------------|-------|
| | territories designated for non-governmental organizations that coordinate the conduct of work in the specified areas with the Headquarters of JFO) | | | |
| 3.3. | Conducting a technical inspection on the facilities of the transport system of the liberated territories of Donetsk and Luhansk regions | SSTS | Constantly | |
| 3.4. | Conducting a technical inspection by non-governmental organizations under the coordination of the Ministry of Defense in the plots specified in the appendix (in agreement with the Headquarters of JFO) | Non-governmental organizations | Constantly | |
| 4. Demining of territories and facilities in administrative districts of Donetsk and Luhansk regions | | | | |
| 4.1. | Demining of the area and infrastructure facilities on the liberated territory of Donetsk and Luhansk regions, where divisions of AF of Ukraine and other military units carry out tasks related to JFO (with the exception of mine explosion barriers of the system of engineering barriers of JFO) | AF of Ukraine | Constantly | |

| Item No. | Name of tasks and activities | Implemented by | Deadline | Notes |
|----------|--|--------------------------------|------------|-------|
| 4.2. | Demining of the area and infrastructure facilities under the control of the Ukrainian authorities in the territories of Donetsk and Luhansk regions, including in inland waters and the water area of the Sea of Azov and in the areas specified in the appendix (except for areas where the divisions of AF of Ukraine, other military units perform tasks related to the JFO and territories designated for non-governmental organizations that coordinate the conduct of work in the specified areas with the Headquarters of JFO), taking into account the requirements of the Law of Ukraine dated 18.01.2018 “On the peculiarities of State policy on ensuring Ukraine’s State sovereignty over temporarily occupied territories in Donetsk and Luhansk regions” | SESU | Constantly | |
| 4.3. | Demining on the facilities of the transport system of the liberated territories of Donetsk and Luhansk regions in the areas specified in the appendix | SSTS | Constantly | |
| 4.4. | Demining by non-governmental organizations under the coordination of the Ministry of Defense (in agreement with the Headquarters of JFO) in the plots specified in the appendix | Non-governmental organizations | Constantly | |

| Item No. | Name of tasks and activities | Implemented by | Deadline | Notes |
|--|--|---|---|-------|
| 5. Quality control of the cleared areas | | | | |
| 5.1. | Quality control of the cleared areas | AF of Ukraine, SESU (external quality control) AF of Ukraine, SESU, SSTS, other organizations, including non- governmental (internal quality control) | After clearance of the territory. Constantly | |
| 6. Transfer of unlocked (cleared) territories to local self-government agencies | | | | |
| 6.1. | Transfer of unlocked (cleared) territories to local self-government agencies (beneficiaries) taking into account the requirements of national standards in the area of anti-mine activities | Forces of JFO, SESU, SSTS and other demining organizations | After clearance and quality control. | |
| 7. Informing the population on risks related to mines and explosive remnants of war | | | | |
| 7.1. | Informing the population on risks related to mines and explosive remnants of war and on measures of humanitarian demining in settlements (areas) located near plots where humanitarian demining activities are | Divisions of JFO, SESU, SSTS and other demining organizations | When identifying a hazardous (suspicious) plot, when carrying out marking activities, | |

| Item No. | Name of tasks and activities | Implemented by | Deadline | Notes |
|-----------------------------------|--|--|---|-------|
| | conducted. | | before works begin | |
| 7.2. | Informing the population about mine danger in the territory of Donetsk and Luhansk regions | Ministry of Defence, divisions of JFO, SESU, SSTS, Ministry of Temporarily Occupied Territories and non-governmental organizations | Constantly | |
| 8. Reporting and informing | | | | |
| 8.1. | Submitting reports on the progress of non-technical and technical inspections, demining / clearance of territories, external quality control of demining, as well as acts of transfer of unlocked / cleared areas by local self-government agencies in areas of liability and acts of liquidation of the hazard on a plot (in the district) to the Ministry of Defense | AF of Ukraine, SESU, SSTS, and other organizations engaged in demining | Monthly (until the tenth day of the next reporting period) and general report for 2019 as of December 1 until December 10. | |
| 8.2. | Providing a report on informing the population about the risks related to mines and explosive remnants of war for a month through the Joint Center for Civil-Military | Divisions of JFO, SESU, SSTS, regional MCA and other demining | Monthly until the 5th day of the preceding month. | |

| Item No. | Name of tasks and activities | Implemented by | Deadline | Notes |
|----------|--|---------------------|--|-------|
| | Cooperation of the Headquarters of JFO | organizations | | |
| 8.3. | Generalization of information (data processing in the information management system) on the basis of received information from all participants involved in the conduct of non-technical inspection and humanitarian demining, as well as acts of transfer of unlocked / cleared territories to local self-government agencies and acts of liquidation of the hazard on a plot (in the district) | Ministry of Defence | Constantly | |
| 8.4. | Publication of generalized information on identified hazardous (suspicious) plots, the course of non-technical inspection and implementation of humanitarian demining activities, as well as the results of the transfer of the unlocked / cleared territories (on the official website of the Ministry of Defense of Ukraine) | Ministry of Defence | Once in 6 months | |
| 8.5 | Providing information to interested CEBs, local governments, and other organizations on the implementation of humanitarian demining activities for a particular identified area | Ministry of Defense | On a separate request for each identified site | |

| Item No. | Name of tasks and activities | Implemented by | Deadline | Notes |
|---|--|---|------------|-------|
| 9. Participation in international cooperation activities | | | | |
| 9.1. | Cooperation with international governmental and non-governmental organizations, countries, experts and other parties interested in the area of mine action | Ministry of Defence, AF of Ukraine, MTOT, SESU, SSTS and Headquarters of JFO | Constantly | |
| 9.2. | Engaging international technical assistance to ensure the fulfillment of demining tasks | Ministry of Defence, AF of Ukraine, MTOT, SESU, SSTS and Headquarters of JFO | Constantly | |

Appendices:

1. List of plots for humanitarian demining activity in 2020;
2. List of high priority territories for non-technical inspection in order to identify hazardous (suspicious) plots and their subsequent marking and implementation of technical inspection, and demining (clearing), provided by regional military civil administrations and Ministry of Temporarily Occupied Territories;
3. List of territories of common priority for non-technical inspection in order to identify hazardous (suspicious) plots and their subsequent marking and technical inspection, demining (clearing) or cancellation measures provided by organizations involved in humanitarian demining
4. List of plots of liberated territories of Donetsk and Luhansk regions for external control and transfer to local self-government agencies.

List of plots for humanitarian demining activity in 2020

| Item No. | Region | District | Locality | Name of plot | Area of plot, sq.m. | Information available on plot (contamination type, status, demining method, clearance depth, mines/ERW found, etc.) | Coordinates of the starting point (coordinate system) | Suggested activities in 2019 (NTI, TI, demining, clearance of area of operations, quality control) |

|-----|--|------------------------|--|---|--------|--------------------------|---------------------------|--|
| 234 | Luhansk | Popasnianskyi district | Popasna city – Zolote-1 | OL-6 kV Karbonit-Popasna No. 11 | 240000 | Transport infrastructure | Clarification is required | Technical inspection for safe use of the plot (demining), operating response |
| 235 | Luhansk | Popasnianskyi district | Zolote -2 running line Shypilove railway station | OL-6 kV Karbonit-Popasna No. 12 | 240001 | Transport infrastructure | Clarification is required | Technical inspection for safe use of the plot (demining), operating response |
| 236 | Luhansk | Popasnianskyi district | Zolote -2 running line Shypilove railway station | OL-6 kV branch line for Shypilove railway station | 28000 | Transport infrastructure | Clarification is required | Technical inspection for safe use of the plot (demining), operating response |
| 237 | Luhansk | Popasnianskyi | Popasna city | OL-6 kV TP10-TP17 («former» base ED-3) | 20000 | Transport infrastructure | Clarification is required | Technical inspection for safe use of the plot (demining), operating response |
| 238 | Engaging the units of the Armed Forces of Ukraine in the implementation of operating response measures to eliminate the risks of mines and explosive remnants of war, demining of infrastructure facilities, demining (checking) the routes of civilians, humanitarian missions, and civilian life-support facilities. | | | | | | | |

Note: 1. Destruction of EH detected (identified) by non-governmental organizations will be carried out by the demining groups (calculations) of JFO.

2. Demining works are carried out only on plots that are outside the territory of the positioning of troops (forces) and elements of the barrier system. All work must be coordinated with the staff of JFO. The admission to the execution of works on plots that are located within 15 km from delimitation line will be made by a separate decision of the command staff of JFO for each plot.

3. Organizations involved in implementing the measures of the Plan are obliged to mark the perimeters of the plots assigned to them for the performance of work using the long-term marking system, as well as to maintain the fencing.

4. The distribution of plots may vary depending on the situation prevailing in the districts identified in the Plan, as well as taking into account other factors that may affect the performance of the tasks.

List of high priority territories for non-technical inspection in order to identify hazardous (suspicious) plots and their subsequent marking and implementation of technical inspection, and demining (clearing)

| Item No. | Region | District | The nearest locality | Purpose of the plot | GIS information (WGS84), coordinate system | Організація, відповідальна за проведення НТО, маркування ідентифікованих загроз, проведення подальших заходів |

Note: 1. Non-technical inspection is carried out by all organizations in the areas of humanitarian demining in accordance with the previously established order.

2. Non-technical inspection is carried out only on plots that are outside the territory of the positioning of troops (forces) and elements of the barrier system. All work must be coordinated with the staff of JFO. The admission to the execution of works on plots that are located within 15 km from delimitation line will be made by a separate decision of the command staff of JFO for each plot.

3. The distribution of plots may vary depending on the situation prevailing in the districts identified in the Plan, as well as taking into account other factors that may affect the performance of the tasks.

4. The organization that has identified the hazardous (suspicious) plot is in charge of the establishment and maintenance of the marking system.

5. When identifying the boundaries of suspicious and hazardous plots, it is prohibited to cross the boundaries of previously fixed plots, if necessary, to re-register the sites.

6. When several organizations simultaneously identify a new suspicious (hazardous) plot, the decision on the implementation of further measures in such plots is adopted by the Ministry of Defense of Ukraine taking into account available organizational resources and the situation around the plot.

Note: 1. Non-technical inspection is carried out by all organizations in the areas of humanitarian demining in accordance with the previously established order.

2. Non-technical inspection is carried out only on plots that are outside the territory of the positioning of troops (forces) and elements of the barrier system. All work must be coordinated with the staff of JFO. The admission to the execution of works on plots that are located within 15 km from delimitation line will be made by a separate decision of the command staff of JFO for each plot.

3. The distribution of plots may vary depending on the situation prevailing in the districts identified in the Plan, as well as taking into account other factors that may affect the performance of the tasks.

4. The organization that has identified the hazardous (suspicious) plot is in charge of the establishment and maintenance of the marking system.

5. When identifying the boundaries of suspicious and hazardous plots, it is prohibited to cross the boundaries of previously fixed plots, if necessary, to re-register the sites.

6. When several organizations simultaneously identify a new suspicious (hazardous) plot, the decision on the implementation of further measures in such plots is adopted by the Ministry of Defense of Ukraine taking into account available organizational resources and the situation around the plot.

Note: The list of areas of the liberated territories of Donetsk and Luhansk oblasts for external quality control and transfer to local governments may be expanded in case of non-technical / technical inspection and humanitarian demining measures in the areas defined in Annexes 1.2.3

1. *Ukraine reported on progress made, with efforts in 2019 culminating in 24 areas measuring 170 hectares handed over to representatives of local authorities. Ukraine reported a total of 460'000 explosive devices having been identified and destroyed. Ukraine further reported that preliminary estimates show that about 8% of the lands (totalling to 7'000 square kilometres), which were liberated from the occupation administration in Donetsk and Luhansk regions, contain or are suspected to contain anti-personnel mines, unexploded ordnance (UXO) and explosive remnants of war (ERW).*

The request would benefit from Ukraine reporting in a manner consistent with IMAS by providing information on the remaining challenges, disaggregating by 'suspected hazardous areas' and 'confirmed hazardous areas' and their relative size, as well as by the type of contamination (e.g. anti-personnel mines, ERW) and report on progress in accordance with the land release methodology employed (i.e. cancelled through non-technical survey, reduced through technical survey, or cleared through clearance) in accordance with Action #22 of the Oslo Action Plan. In this regard, the request would benefit from Ukraine employing tables from the Guide to Reporting in line with Action #8 of the Oslo Action Plan (Annex 1 and Annex 2).

The Action Plan on Humanitarian Demining of Liberated Territories of Donetsk and Luhansk regions for 2020 (hereinafter - the Plan) identifies areas where presence of anti-personnel mines has been confirmed, in the liberated districts of Donetsk and Luhansk regions. These anti-personnel mines are found in areas beyond the reach of fire of the occupying forces of the Russian Federation. At the same time, drawing up additional action plans for demining of anti-personnel mines and other explosive devices is impractical, given that mine action operators involved in demining receive tasks in both directions of the Plan.

Regarding the details of types of pollution of 7000 km² (anti-personnel mines, anti-vehicle mines and explosives remnants of war) and the type of hazardous areas: "suspected hazardous areas" and "confirmed hazardous areas" declared in the Request for Extension of Article 5 as presumably hazardous: identification of specific areas where antipersonnel mines have been installed is possible after a complete ceasefire by the occupying forces of the Russian Federation and a technical inspection of the allegedly contaminated areas along the demarcation line.

In addition, in order to implement Action № 8 of the Oslo Plan and to maintain the principle of transparency, Ukraine, in accordance with the requirements of Article 7 of the Ottawa Convention, regularly provides annual reports on progress and problems in the implementation of the Convention.

В Плані заходів з організації робіт гуманітарного розмінування звільненої території Донецької та Луганської областей визначені ділянки місцевості, де підтверджено наявність протипіхотних мін, в звільнених районах Донецької та Луганської областей (далі - План), які знаходять в районах поза досяжності засобів вогневого ураження з боку окупаційних сил Російської Федерації. В той же час складання окремих планів щодо розмінування від протипіхотних мін та розмінування від інших вибухонебезпечних предметів є недоцільним з огляду на те, що оператори з протимінної діяльності, які залучаються до розмінування, отримують в Плані завдання за обома напрямками.

Відносно деталізації по видам забруднення (протипіхотні міни, протитранспортні міни та вибухонебезпечні предмети залишки війни) 7000 кв. км та типу небезпечних районів: "підозрювані небезпечні зони" та "підтверджені небезпечні зони", які заявлені в Запиті на продовження дії статті 5 як імовірно небезпечні, слід зазначити, що визначення конкретних районів, де встановлені протипіхотні міни, можливе після повного припинення вогню з боку окупаційних сил Російської

Федерації та проведення технічного обстеження імовірно забруднених районів вздовж лінії розмежування.

З метою реалізації Дій № 8 та № 22 Плану Осло та підтримання принципу прозорості, відповідно вимогам статті 7 Оттавської конвенції Україна на постійній основі, у визначені терміни надає щорічні звіти про прогрес та проблеми з реалізації Конвенції.

2. In order to have a more accurate picture of the remaining contamination in government-controlled area, the request would benefit from Ukraine providing more details on the calculations used to estimate remaining contamination in government-controlled areas. The extension request would also benefit from additional information on the efforts Ukraine will undergo over the extension period to develop an accurate baseline of contamination in areas of eastern Ukraine under government control which can be used as a basis for a further and more detailed extension request after this period in accordance with Action #18 of the Oslo Action Plan.

Action 18 of the Oslo Plan will be implemented by the deadline – 2021 in case of the restoration of territorial integrity of Ukraine within the internationally recognized state border.

As the restoration of the territorial integrity of Ukraine is implemented, measures will be taken for non-technical and technical inspection of presumably dangerous areas, to determine the nature of pollution.

Дія 18 Плану Осло буде реалізована в разі відновлення територіальної цілісності України в межах міжнародно визнаного державного кордону до визначеного терміну – 2021 рік. По мірі реалізації відновлення територіальної цілісності України будуть здійснені заходи з нетехнічного та технічного обстеження імовірно небезпечних районів, з визначенням характеру забруднення.

3. Ukraine has provided detailed information on the socioeconomic impact of contamination on the civilian population. In line with Action #24 of the Oslo Action Plan, the request would benefit from the inclusion of a detailed, costed and multi-year plans for context-specific mine risk education and reduction in affected communities taking into account Actions #28 - #32 of the Oslo Action Plan. The request would also benefit from information on the number of casualties of anti-personnel mines since the last extension period, disaggregated by gender, age and disability as well as location.

n/a

4. The request indicates that “besides finding the industrial-made APM in liberated areas, there are also many cases of use of improvised explosive devices (IED)”. The Committee takes the opportunity to recall that States Parties affected by anti-personnel mines of an improvised nature will ensure that they apply all provisions and obligations under the Convention to such contamination as they do for all other types of anti-personnel mines, including during survey and clearance in fulfilment of Article 5 and disaggregate by types of mines when reporting as per Action #21 of the Oslo Action Plan. This is equally important for a State Party’s reporting commitments. In this regard, it is important that Ukraine report their detection and destruction disaggregated by type of mine, including mines of an improvised nature which fall under the scope of the Convention.

Cases of detection of improvised explosive devices (hereinafter - SVP) are recorded by the Security Service of Ukraine and the National Police of Ukraine. Areas where SVPs are

detected during a non-technical / technical survey are subsequently included in the Plan as "suspected hazardous areas" and "confirmed hazardous areas".

Випадки виявлення саморобних вибухових пристроїв (далі – СВП) фіксуються Службою безпеки України та Національною поліцією України. Райони де виявлені СВП під час проведення нетехнічного/технічного обстеження в подальшому включаються до Плану як "підозрювані небезпечні зони" та "підтверджені небезпечні зони".

5. The request indicates that “in order to have common approaches to the implementation of demining tasks in accordance with international mine action standards, the national standard DSTU P 8820-1: 2018 “Mine action. Management processes. Basic Provisions” was developed and entered into force on April 1, 2019.” The request would benefit from information on whether these standards are up to date in accordance with the latest International Mine Action Standards (IMAS) to ensure efficient and effective implementation in accordance with Action #5 of the Oslo Action Plan. The request would further benefit from Ukraine providing information on how it ensures an evidence-based approach is employed to recording Suspected Hazardous Areas and Confirmed Hazardous Areas.

National standard for mine action National standard for mine action DSTU-P 8820: 2018 “Mine action. Management processes. Basic Provisions” based on IMAS standards, and adapted to the specifics of the situation in Eastern Ukraine. Currently, the standard is being tested. Based on the results of testing, respectful amendments will be introduced into the standard.

Національний стандарт з протимінної діяльності ДСТУ-П 8820:2018 “Протимінна діяльність. Процеси управління. Основні положення” на основі стандартів IMAS, та адаптований до специфіки ситуації на Сході України. Наразі стандарт апробується та за результатами апробації, до стандарту будуть підготовлені та внесені відповідні зміни та доповнення.

6. The request indicates that the Ministry of Defence of Ukraine together with the interested authorities prepares an Action Plan on an annual basis for operations in the liberated territories of Donetsk and Luhansk regions with the main objectives of the Plan being to conduct non-technical and technical survey of potentially dangerous areas for mines and ERW, as well as demining of settlements, to provide security during restoration of infrastructure and clearing of agricultural areas from mines and explosive remnants of war. The request would benefit from the inclusion of a more detailed, and costed workplan for the extension period, including:

- *projections of annual survey and clearance output, in accordance with the land release methodology employed (i.e. cancelled through non- technical survey, reduced through technical survey, or released through clearance), for the areas which are under the government’s control;*
- *overview of the resources that are available today, what additional international support might be requested, and how Ukraine is going to utilise resources to address outstanding clearance obligations;*
- *how survey and clearance will be prioritized during the extension period;*
- *what methodologies and standards are used for implementation of the workplan; and*
- *main risks and challenges that might hinder progress.*

Information is provided in the Action Plan on Humanitarian Demining of Liberated Territories of Donetsk and Luhansk regions for 2020 (see Annex 1).

The situation when Ukraine currently does not have full control over the Autonomous Republic of Crimea and certain territories of Donetsk and Luhansk regions causes the main risks and problems that may hinder progress in the implementation of the Plan. Thus, it is currently impossible to determine the exact amount of areas contaminated with antipersonnel

mines, to draw up appropriate national demining programs in these areas and to carry out demining work.

Demining of these territories will begin after the end of hostilities, the restoration of the constitutional order and the restoration of the territorial integrity of Ukraine within the internationally recognized state border.

At the same time, "suspected dangerous zones" in the territories under control by the Government of Ukraine are constantly under fire from the armed forces of the occupation administration of the Russian Federation in Donetsk and Luhansk regions, which greatly complicates mine action, including long-term planning.

Надання Плану буде відповіддю на запитання.

Основними ризиками та проблемами, які можуть перешкоджати прогресу в реалізації Плану є те що Україна на сьогодні не має повного контролю над Автономною Республікою Крим та окремими територіями Донецької та Луганської областей. Таким чином на даний час неможливо визначити точний обсяг територій забруднених протипіхотними мінами, скласти відповідні національні програми з розмінування на цих територіях та проводити роботи з розмінування.

Розмінування вказаних територій буде розпочате після завершення бойових дій, відновлення конституційного порядку та відновлення територіальної цілісності України в межах міжнародно визнаного державного кордону.

В той же час території, які розташовані на територіях підконтрольних Уряду України і є "підозрювано небезпечними зонами" підвергаються постійним обстрілам з боку збройних формувань окупаційної адміністрації Російської Федерації в Донецькій та Луганській областях що в значній ступені ускладнює, а часто унеможлиблює проведення заходів розмінування, а також здійснення перспективного планування в сфері протимінної діяльності.

7. The request would benefit from clarification on the demining capacity that is deployed in Ukraine and the planned capacity for the period of the extension request including a breakdown by operators (including national capacity), by number of survey and clearance teams and by number of survey and clearance personnel.

Information mentioned in the Action Plan on Humanitarian Demining of Liberated Territories of Donetsk and Luhansk regions for 2020 (see Annex 1).

Зазначена інформація згадана в інформаційному матеріалі до Запиту на продовження дії статті 5 Оттавської конвенції.

8. The request would benefit from information on steps Ukraine is taking to integrate gender and take the diverse needs and experiences of people in affected communities into its mine action programme such as ensuring mixed-gender survey teams to help enable inclusive consultations with all groups in the local communities during survey and clearance efforts and how Ukraine ensures consideration for the needs of women, girl, boys, men, and ethnic and minority groups into account during prioritization, planning, and tasking of survey, clearance and mine risk education activities.

Reducing the number of victims of mines and explosive remnants of war largely depends on the quality and effectiveness of MRE of war.

Public awareness activities on the risks associated with mines and explosive remnants of war are carried out by all executors of the annual action plans on humanitarian demining in the liberated territories of Donetsk and Luhansk regions.

In 2018-2020 an interactive map of areas contaminated with mines and explosives was developed by the Ministry of Defence of Ukraine with the assistance of the Geneva International Centre for Humanitarian Demining and the OSCE Project Co-ordinator in Ukraine according to the Order of the Cabinet of Ministers of Ukraine "On approval of the

action plan for the implementation of the Open Government Partnership Initiative” of December 18, 2018 № 1088-r. The Map is posted on the web-page of the Ministry of Defence of Ukraine in open access in the section "Mine action".

The Map ensures access to information on areas contaminated with mines and explosives for all entities who are involved in mine action.

The map highlights areas identified as hazardous or suspicious of mine threats or explosive remnants of war. The information on the area, type of hazard, date of identification and the organization which is responsible for mine action is displayed on the web-page for each area. The map shows medical institutions that are able to provide medical care for mine injuries. In addition, the map shows hospitals which are able to provide medical care for mine injuries.

Зменшення кількості постраждалих від мін та вибухонебезпечних залишків війни в значній мірі залежить від якості та ефективності інформування населення про ризики, пов'язані з мінами та вибухонебезпечними залишками війни.

Заходи інформування населення про ризики, пов'язані з мінами та вибухонебезпечними залишками війни виконуються всіма виконавцями щорічних планів заходів з організації робіт гуманітарного розмінування звільнених територій Донецької та Луганської областей.

Відповідно до розпорядження Кабінету Міністрів України від 18 грудня 2018 року № 1088-р «Про затвердження плану дій із впровадження Ініціативи «Партнерство «Відкритий Уряд» у 2018-2020 роках та з метою забезпечення доступу до інформації про території, забруднені мінами та вибухонебезпечними предметами, всіх суб'єктів, які залучаються до провадження протимінної діяльності, а також представників громадськості Міністерством оборони України за сприянням Женевського міжнародного центру гуманітарного розмінування та Координатора проектів ОБСЄ в Україні розроблено Інтерактивну карту територій, забруднених мінами та вибухонебезпечними предметами, яка висвітлена на офіційному сайті Міністерства оборони України у відкритому доступі у розділі «Протимінна діяльність».

На зазначеній карті висвітлені ідентифіковані ділянки, які є підтверджено небезпечними або підозрілими щодо наявності загроз від мін або вибухонебезпечних залишків війни, крім того щодо кожної ділянки відображається інформація про площу, тип небезпеки, дату ідентифікації та організація, яка відповідальна за роботи на ділянці. Також, на карту нанесено лікувальні заклади, які спроможні надавати медичну допомогу при мінно-вибухових травмах.

9. The request would benefit from additional information on the annual budget for operation and requirements for support as well as the contribution from the government of Ukraine to demining operation in line with Action #1 of the Oslo Action Plan. Additionally, the request would benefit from information on Ukraine's resource mobilization plans in line with Action #43 of the Oslo Action Plan.

N/A

10. Given the importance of a central focal point, the Committee welcomes information on Ukraine's efforts to establish a National Mine Action Centre. The request would benefit from additional information on ongoing efforts and, in particular, the timeline of Ukraine to ensure the establishment of the National Mine Action Centre.

The Law of Ukraine "On Mine Action in Ukraine" entered into force on January 25, 2019. The process of implementation of legislation in the field of mine action continues. In particular. On June 16, 2020 the Draft Law was adopted in the first reading. The proposals of parliamentarians on the preparation of the draft law for consideration in the second reading

are currently being worked out. According to the draft law the implementation of its provisions will be provided within 6 months from the date of its entry into force.

В Україні 25 січня 2019 року набрав чинності Закон України “Про протимінну діяльність в Україні” та триває процес імплементації законодавства у сфері протимінної діяльності, зокрема до Верховної Ради України внесений проект Закону про внесення змін до Закону України “Про протимінну діяльність в Україні”, який вдосконалює чинний Закон та створить юридичні підстави для розробки національної програми протимінної діяльності. 16 червня 2020 року зазначений проект Закону прийнятий у першому читанні. Наразі опрацьовуються пропозиції народних депутатів щодо підготовки проекту Закону до розгляду у другому читанні. Проектом Закону передбачається реалізація його положень протягом 6 місяців з дня набуття ним чинності.
