COUNTRY CONTEXT

Located in Southern Africa, Angola shares its borders with the Democratic Republic of Congo, Zambia, Botswana and Namibia, covering a total area of 1.246.700 km². Angola has an estimated population of 33 Million. Angola has:

- 18 Provinces
- 163 Municipalities
- 552 Communes
- 16.900 Locations

Background to the conflict

Landmine contamination in Angola is the result of a long war period of more than 3 decades

1961 -2002

Conflict
1992 - 2002

Background to the Conflict

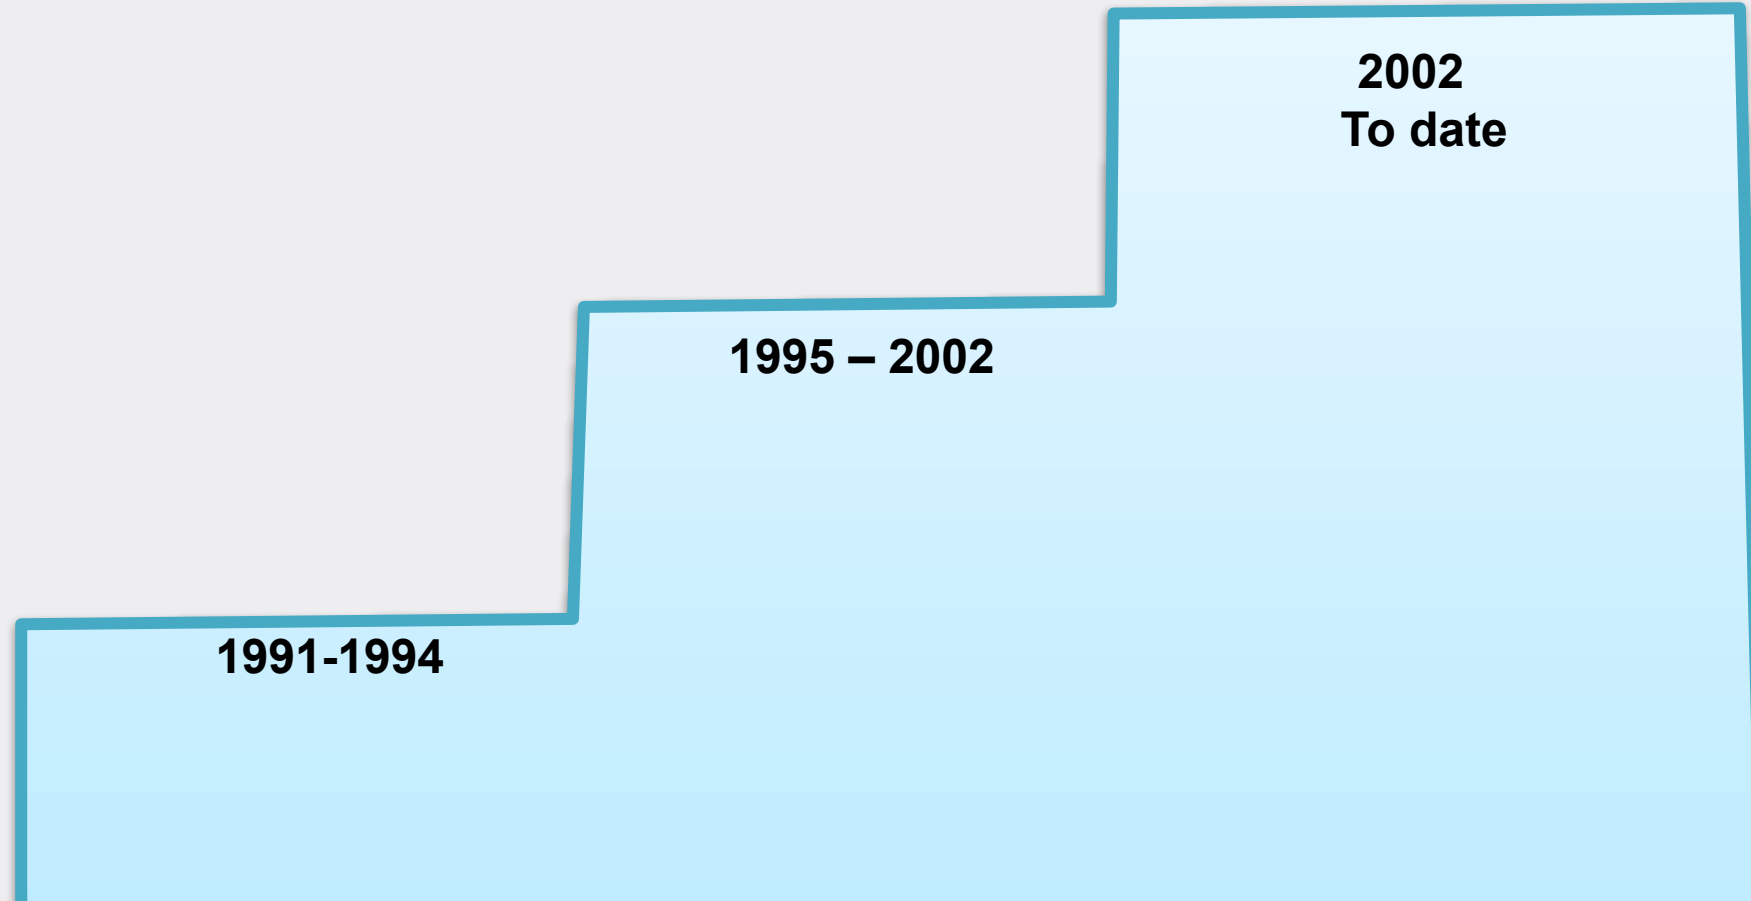

Outcomes of the Conflict

- Landmine contamination throughout the country.
- More than 50 types of mines (AP and AT)
- Various UXO's.

Demining Periods

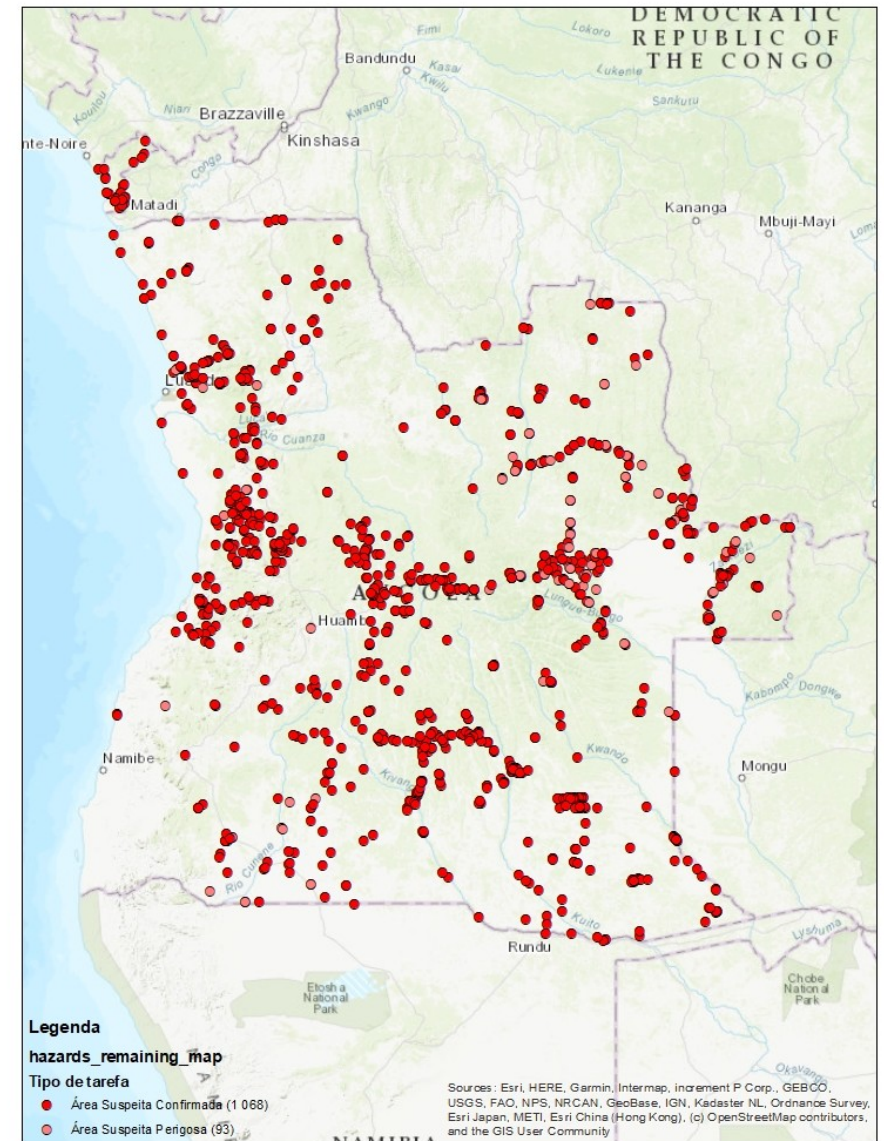

- Demining in Angola is characterised by three distinct periods:

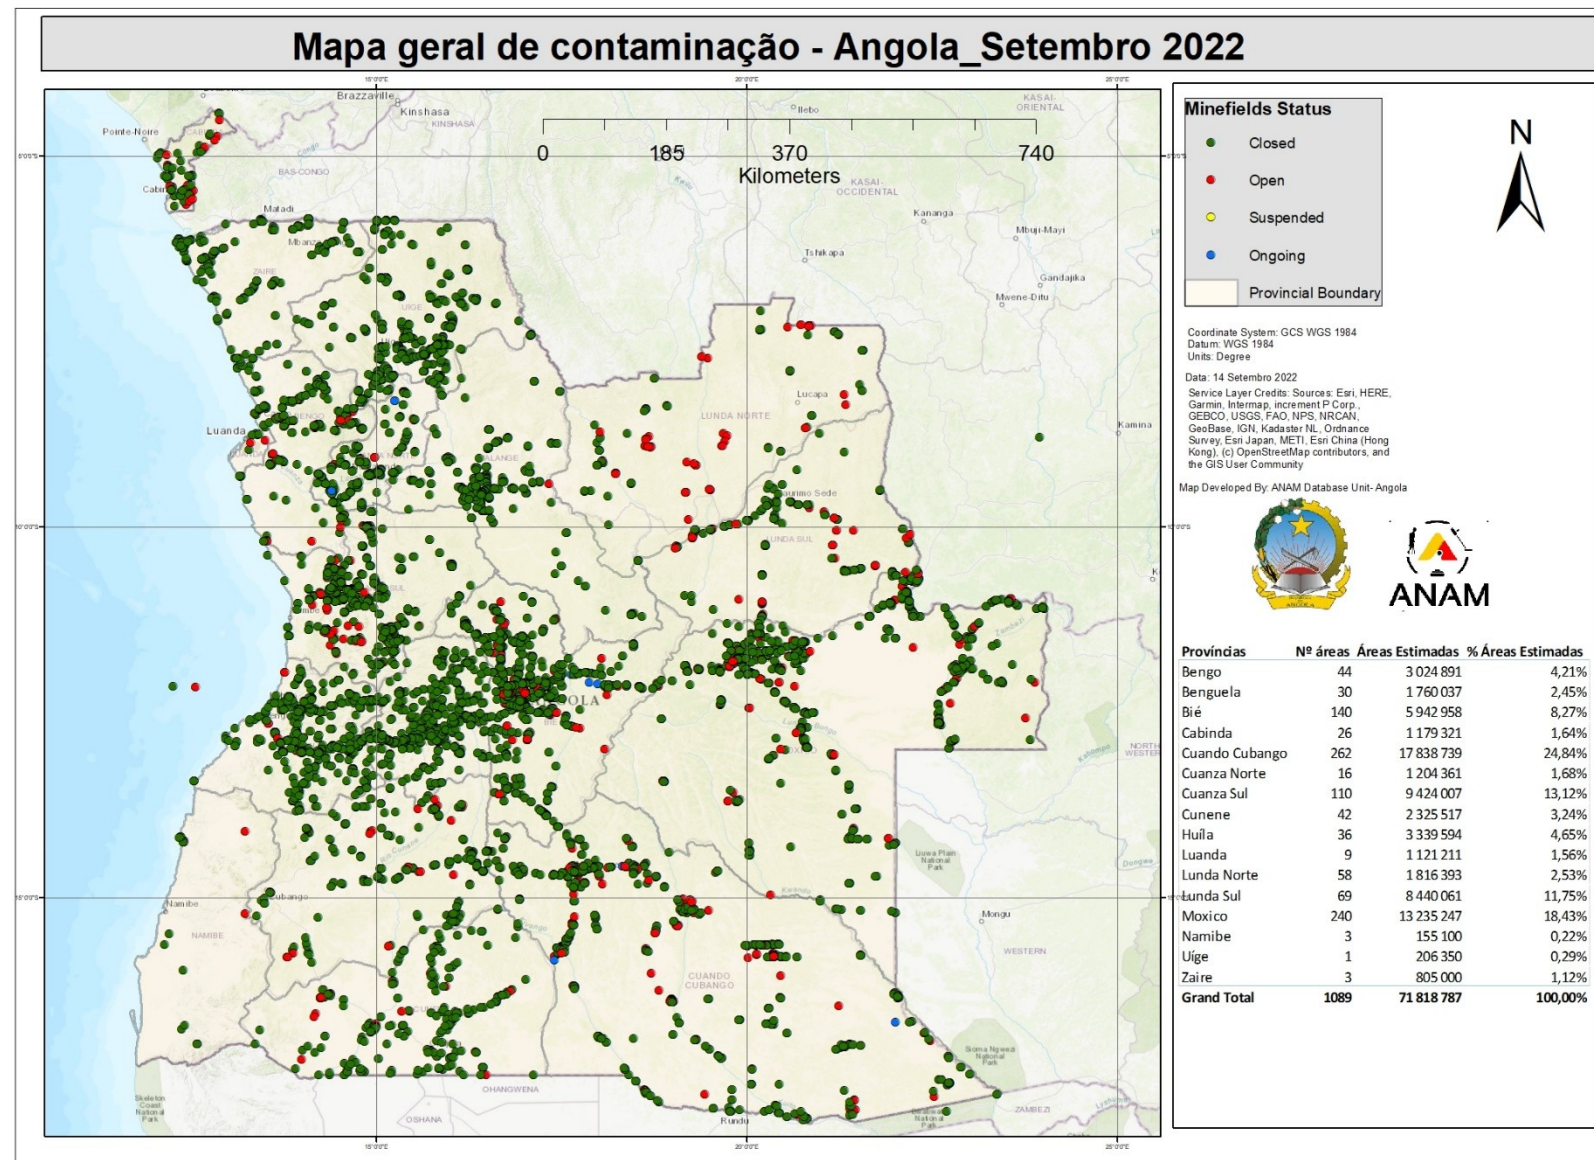

IMPACT SURVEY

From April 2004 to May 2007, the country carried out a Landmine Impact Survey project on communities, having identified around 3,293 Suspected Hazardous Areas of contamination with mines. Of these, around 2,204 areas have already been cleared, corresponding to 67% with the process of non-technical survey, technical survey, cancellations and actual clearance.

From the work carried out by public and private operators and national and foreign NGOs today, the level of contamination has reduced to 1,089 areas corresponding to 71,818,787m². Of which 92.29% are Confirmed Hazardous Areas (CHA) and 7.71% represent Suspected Hazardous Areas (SHA).

The provinces of **Huambo** and **Malanje**, according to ANAM's Central Database, have no confirmed hazardous areas of contamination with mines and other explosive ordnance.

REMAINING AREAS WITH HIGHER CONTAMINATION

PROVINCES	NUMBER OF REMAINING HARZADOUS AREAS	CONTAMINATION M²	IMPLEMENTING PARTNER
Bié	140	5,942,958	HALO TRUST
Cuando Cubango	262	17,838,739	HALO TRUST
Bengo	44	3, 296, 891	HALO TRUST
Kuanza Sul	110	9,424,007	APOPO/APACOMINAS
Lunda Norte	58	1,816,393	MAG
Lunda Sul	69	8,440,061	MAG
Moxico	240	13,235,247	MAG

Next Steps

- The broad international outreach effort that led to collaboration among states for the Mine Ban Campaign and the Convention on the Prohibition of the Use, Production, Stockpiling and Transfer of Anti-Personnel Mines and on their Destruction clearly express the commitment of states to mine clearance.
- Currently the database records a remnant of 1,089 areas. The data offer a wealth of opportunities for analysis and project planning and have led to a number of relevant conclusions on mine action.
- ANAM provided guidelines for the implementation of the National Mine Action Strategy in each province. Of the 1,089 remaining areas, 851 areas corresponding to 78.14%, which do not have funding for the operators.
