
Meeting of the States Parties to the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction

18 September 2023

English only

Twenty-First Meeting

Geneva, 20-24 November 2023

Item 10 (b) of the provisional agenda

**Clearing mined areas and mine risk education and reduction:
Conclusions and recommendations related to the mandate of
the Committee on Article 5 Implementation**

Updated Work Plan

Submitted by Senegal

1. The decision taken by the Eighteenth Meeting of the States Parties on the request submitted by Senegal for an extension of the deadline for completing the destruction of antipersonnel mines in accordance with Article 5 of the Convention¹, indicates that:

“precarious security conditions and the need for collaboration of the Movement of Democratic Forces of Casamance (MFDC) for access to target areas, amongst other matters, and that following the first years of implementation circumstances may change, the Meeting noted that the Convention would benefit from Senegal submitting to the States Parties an updated detailed work plan by 30 April 2023, for the remaining period covered by the extension.

In this regard, the Meeting noted that the updated workplan should contain an updated list of all areas known or suspected to contain anti-personnel mines using terminology consistent with IMAS, annual projections of which areas and what area would be dealt with during the remaining period covered by the request and by which organisation, matched to a revised detailed budget. The Meeting further noted the importance of the plan containing a detailed, costed and multi-year plans for context-specific mine risk education and reduction in affected communities as well as provisions for a sustainable national capacity to address previously unknown mined areas, including newly mined areas discovered following completion.”

2. Senegal’s Updated Work Plan was received on 5 June 2023.

¹ APLC/MSP.18/2020/10.
