CASUALTIES IN THE REGION IN THE PAST DECADE

Country	Total recorded mine/ERW casualties
Albania	17
Bosnia and Herzegovina	64
Croatia	28
Serbia	26
Tajikistan	35
Ukraine	3,670

Overview of Landmine and ERW Casualties 2013-2022

VICTIM ASSISTANCE GLOBAL VIEW

Landmine Monitor 2023

- Healthcare and rehabilitation **services remained under-funded.**
- **Disruption and/or damage & destruction** to services in 2022, including Afghanistan, Sudan, Ukraine, and Yemen.
- Some progress towards improving sustainability by **integrating physical rehabilitation into national healthcare systems**
- **Limited access to economic opportunities** for mine and ERW survivors

Victim Assistance in the region

- **CRPD** has driven significant policy changes towards inclusive victim assistance.
- Medical rehabilitation often **lacks a holistic approach**, focusing mainly on the physical.
- **Survivor involvement** in service design and implementation is largely lacking but **is essential** for effectiveness and relevance.
- Questions: What are the **roles of private and international providers** in the evolving VA landscape?

Thank you.
